

# Japanese Language and Culture Course

- ▶ The Japanese Language and Culture Course strives to achieve three primary goals:

- ▶ ① Japanese Language

Our 6 streamed subjects: Grammar / Structure, Oral Expression, Writing, Reading, Listening, and General Practice, help students gain the necessary Japanese language skills required to study in Japanese universities and graduate schools. We also offer preparation studies for the Japanese University Admission Examination for International Students(EJU) and Japanese-Language Proficiency Test(JLPT).

- ▶ ② Japanese Society and Culture

This course aims to deepen our students' understanding of Japanese society and culture by comparing Japan to their own countries culture and lifestyle. In this way, we can set the stage for a mutual understanding and enjoyment of different cultures.

The course is comprised of 5 subjects: Cross Culture Understanding, Japanese Law, Japanese Society, Japanese Culture, and Japanese History. Lectures are delivered by our diligent and dedicated instructors from the School of Law and the School of Business Administration.

- ▶ ③ Subject of Foundation Studies

This course provides the necessary English language, mathematics, world history and essay writing required for the study in universities or graduate course in Japan.

English language education is conducted by native English speaking instructors, and mathematics and world history are taught by instructors from the Department of Law, the Centre for Teaching Profession, and by instructors within the Japanese Language and Culture Course.
