If you like to race as much as I like to drive a 4x4 (or maybe because your great imagination forces you to do this), you will like this game. This is not a trailer but a direct review. I do not play too much video games, but I play a lot and I make a video review of every game I play. In this video, I do a total breakdown of the game and I share the pros and cons of this first person racing game that takes you out of your comfort zone. This is no simulation, it's a real racer that makes you feel like a racer. No, you don't need a car to play and no, it will not bring you closer to a motorcar, but this game is amazing! Is it a simulator? No, it is not. Is it a simulation of an automobile? Well, not really, but it is a great racing game that takes you back to the middle ages. This is a game where you need to be fast to race, but it is more than a game of speed, it is a game of precision. Precision is a key word in this game and you will feel that you are driving a real car through the best tracks in the world. The roads have been taken by another era and you will drive through it with your 4x4. I did not find it easy to find the settings, but I found it quickly and easy to set up your car. The car is fully customizable and you can choose from a variety of options to control your car. You can choose the engine of your vehicle, the transmission and the steering, your tires, your suspension and your features (like nitro or supercharged). All these options will make your vehicle different from the other. I do not know how many hours of play time you will find in the game, but I found myself in the top three in the world. A racer needs time to improve and if you are the type that hates to lose, this is the game for you. There are no opponents and you are the one who will decide if you will win or if you will lose. You can challenge the leader and you can do it now with this game. I really recommend this game to every single racing fan. No car enthusiast will be disappointed. Have you ever played Top Gear, American Top Gear, Belgian Top Gear, French Top Gear or even Korean Top Gear? I did not. Well, there was no reason to play 520fdb1ae7
