

"Shared Mental Models, Design Thinking and Serious Play: Methods for Envisioning a Sustainable Future"

Research on team processes and performance shows that shared mental models play an important role for effectiveness and achievement. Design Thinking as well as Serious Play are recent trends not only in business organizations but also in educational settings to generate new insights and perspectives. What if we use these findings, methods and tools for purposes such as envisioning a sustainable future? What if we (re)activate playful mindsets and collaboration techniques for creating shared models of how organizations dedicated to sustainable development would look and feel like?

In a playful atmosphere, you will learn how to use Serious Play as a creative method of team-based design thinking and team development.

TOGETHER
WE CAN
CHANGE THE WEATHER

CLAUDIA SCHMITT
MANAGING DIRECTOR AND SCIENTIFIC COORDINATOR
HAMBURG UNIVERSITY
GERMANY

She holds a diploma in psychology and focus on organizational development within her research. Relevant sources of inspiration to her are the surrealism painter Renè Magritte who is playing with language and imagination like no other and Philosophers like William Stern and Hannah Arendt, both pointing out the importance of a regular change of perspective from "me" to "us", to act in a social responsible way. Also music inspires her.
