12 Months FREE
Book Marketing, Automated

Up to 10 campaigns a month, each for a different book

Offer ends 1st December 2027

Every title deserves a campaign, but there are only so many hours in a marketing week. Lead titles get the attention, and the rest of the list too often gets very little.

Inkara turns the ONIX metadata you already have into ready-to-use marketing for every channel, so you can cover more of your list, reuse what you have and stay consistent across it all.

Bulk Automation

Pick your books and your channels, choose a campaign, and Inkara generates the full set of marketing materials in one run.

Amazon A+ Content

One ISBN becomes a complete, retail-ready set of A+ modules, built around your cover, copy and reviews.

Social & Campaign Assets

Create and fine-tune on-brand graphics for Instagram, LinkedIn and Facebook, plus email, flyers, ads and point-of-sale materials.

PDF Editor

Rights and sales catalogs built straight from your metadata or import a template. Click any text to edit, then export for screen, print or an online flip book.
