A legitimate example of this is disabling the key lock when receiving an incoming phone call, and then re-turning the key lock on call finished.android.permission.GET_TASKS: Allows the app to receive information about current and recent tasks. Can allow malicious apps to discover personal information about other apps.android.permission.INTERNET: Allows the app to create a network of sockets.android.permission.READ_PHONE_STATE: Allows the app to access the device's phone features. An app with this resolution can determine the phone number and serial number of that phone, whether the call is active, the number to which the call is connected, and so on.android.permission.RECEIVE_BOOT_COMPLETED: Allows the app to start itself as soon as the system finishes downloading. This can make it take longer to start the phone and allow the app to slow down the shared phone, always install wallpaper.android.permission.SET_WALLPAPER_HINTS: Allows the app to set the size of the wallpaper system hints.android.permission.SYSTEM_ALERT_WINDOW: Allows the app to show system alert windows. Malware apps can take over the entire screen of phone.android.permission.VIBRATE: Allows the app to monitor vibrator.android.permission.WAKE_LOCK: Allows the app to prevent the phone from going sleep.android.permission.WRITE_EXTERNAL_STORAGE: Allows the app to write in SD card.android.permission.WRITE_SECURE_SETTINGS: Allows the app to change the security settings of the data system. Not for the use of conventional applications.android.permission.WRITE_SETTINGS: Allows the app to change system settings data. Malware applications can damage the configuration.com.android.vending.CHECK_LICENSE system: Unknown resolution from android links to view network connections allows the app to view information about network connections, such as which networks exist and are connected. Viewing wi-fi connections allows the app to view Wi-Fi network information, such as whether Wi-Fi and the name of connected Wi-Fi devices are enabled. Pairing with Bluetooth devices allows the app to view bluetooth configuration on the phone, as well as make and accept connections with paired devices. Bluetooth access settings allow the app to set up a local Bluetooth phone, as well as detect and pair with remote devices. Changing your network connection allows the app to change the state of your network connection. Connecting and disconnecting from Wi-Fi allows the app to connect and disconnect from Wi-Fi hotspots and make changes to the device's configuration for Wi-Fi networks. Turning off the lock allows the app to disable the key lock and any associated password security. For example, the phone disables the key lock when receiving an incoming phone call, and then re-locks the key when the call is completed. getting running apps allows the app to get information about tasks that are being performed now and recently. This can allow the app to know which apps are being used on the device. Full access to the network allows the app to create network outlets and use custom network protocols. The browser and other apps provide the tools to send data to the Internet, so this permission is not required to send data to the Internet. Read the state of the phone Allows you to read only access to the state's phone, including the device's phone number, current cellular network information, the status of any current calls, and a list of any PhoneAccounts registered on the device. Running when you start allowing the app to start working as soon as finished downloading. This can make it take longer to start the phone and allow the app to slow down the shared phone, always working. Wallpaper Set Allows App App install system wallpaper. Adjust the size of the wallpaper allows the app to set the wallpaper system the size of the hint. rely on other apps allowing the app to draw on top of other apps or parts of the user interface. They can prevent the use of the interface in any application or change what you think you see in other applications. Vibration control allows the app to control the vibrator. Prevent your phone from sleeping allows the app to prevent your phone from sleeping. Changing or deleting the contents of your SD card allows the app to write on an SD card. Changing the system's secure settings allows the app to change the security settings of the data system. Not for use by regular apps. Malware can damage your system's configuration.
