D& PowerDrive 25-9300 NAPA Replacement Car Rubber Belt. TCI 228600 TH400 Racing Renovation Kit, if you have a 1994-1998 Dodge Cummins one of the most effective ways to get more power from your truck is to add a fuel stop plate to your injection pump... Most people For these things like Cam plates or torque plates, whatever you want to call them, this product can deliver some amazing performance gains. BD diesel diesel fuel stop plates will work for 5.9L Dodge Cummins light duty trucks ranging from vehicle manufactured dates from 1994 to 1998. The BD Diesel Aluminum Camera Plate for the Bosch 7100 petrol pump commonly known as a cam board, BD's fuel stop plate controls the rack ride, which affects the amount of fuel the Bosch 7100 fuel pump provides. Six different ramp designs allow power gains from 30 to 150 thrones and a torque of 70 to 300 feet. This unit comes with a hose opening and a projected push to improve turbo performance by increasing the boost. This is done by releasing a contained amount of air before waste to allow waste to hold longer, effectively increasing the boost. BD Diesel Camplate or Petrol Stop Plate Features and Benefits controls the amount of fuel the injection pump provides six different designs that allow perfect performance gains and comes with a designed fit to increase turbo performance and comes as a full installation set with included note instructions: requires disassembly and assembly of fuel pump. Any changes must be made by a qualified pump technician otherwise damage may cause, excessive heat/smoke can be generated and/or poor performance may occur. Note: Only legal in California for racing vehicles which will never be used on a road Give us a call at 714-848-2170 M-F from 8-5 PST – we will answer your questions regarding BD diesel stop panels. Live in the area? Don't fight to stop at our location and meet us! OC Diesel, INC. is located at 17242 Gothard Street, Huntington Beach, CA 92647 Suites A and B.
