Capture it All Olympus products are built to the highest quality standards and should provide you with years of satisfaction. Ensure long-term use of your purchase with an extended warranty only for the Olympus OM-D body. EXTENDED WARRANTY SERVICES: Coverage of defects in materials or manufacturing within two years of the original manufacturer's warranty period. One free inspection and cleaning during the warranty period. What is covered by the extended warranty? If the Olympus product cannot function properly under normal and proper use due to defects in materials or manufacturing, during this extended warranty period, Olympus will, of its choice, either repair on a free basis for parts or labor, or replace. Please note: An extended warranty must be purchased during the initial warranty period: First year on a new product, 90 days on a refurbished product. Extended warranty is limited to a product sold in the U.S., its territories, and Canada from authorized Olympus dealers. Repairs will only be carried out in the appropriate locations. Purchase Extended Guarantee Affordable Shooting Modes for E-M10 Mark III are (AUTO), SCN (21 Scene Mode), (Advanced Photo), ART (15 Art Modes), P (program mode), A (priority mode of the aperture), S (shutter priority mode), M (guide mode), (Movie Mode). The camera automatically adjusts the settings most suitable for the scene, which is convenient for beginners. Available guide in real 2000. Some menu settings cannot be changed. SCN (Scene Mode) This mode allows you to shoot in the appropriate settings, choosing under the mode best suited for the subject or scene. Select the overall situation under mode 1 and then specific mode under mode 2. Sub Mode 1 Sub Mode 2 Portrait of People, Electronic Portrait, Portrait - Landscape, Portrait - NightScape, Children's NightScape, Portrait - NightScape, Portable Starlight, Fireworks, Light Trails Movement Sport, Kids, Panorama Landscape, Sunset, Snow, Rear Light HDR Indoor Candles, Candles Portrait, Electronic Portrait, Kids, Backlight HDR Close-up Macro, Nature Macro, Documents, Multi Focus Shot (Advanced Photo Mode) This mode sets the extended shooting mode in one click. Set the set mode and select the AP mode you want. AP Live Composite Description To record light traces of stars and other objects while keeping the overall exposure constant. Image mode and White Balance can be changed, which is impossible in SCN Light Trails mode. Live Time This mode is suitable for shooting fireworks and nightscapes. Long-term exposure is possible at the chosen duration. Multiple exposures combine two different images into one shot. HDR captures details in both bright glare and deep shadow areas. Silent disables camera sounds and lights in situations where they may be undesirable. Panorama To take photos that can then be combined on a computer to create a panoramic image. Keystone Compensation corrects distortions of perspectives in photographs of buildings or landscapes. AE braces Every time the shutter button is pressed, the camera takes a series of photos, changing the exposure of each shot. Focus brackets Every time the shutter button is pressed, the camera takes a series of eight photos, changing the focus distance of each shot. ART (ART mode) This mode allows you to apply creative effects with artistic filters. Color filters and monochrome color options are available for some artistic filters. Available art filters: Pop Art, Soft Focus, Pale Light Color, Light Tone, Grainy Film, Pin Hole, Diorama, Cross Process, Gentle Sepia, Dramatic Tone, Key Line, Watercolor, Vintage, Partial Color, Bleach Bypass P (Program MofE) Camera automatically sets optimal diaphragm and shutter speed based on lighting conditions. A (Aperture Priority Mode) When the aperture value (F-stop number) is set manually, the camera automatically sets the appropriate shutter speed. S (Shutter Priority Mode) When the shutter speed is set manually, the camera automatically sets the corresponding aperture. Both the diaphragm and the shutter speed can be manually installed. You can also install BULB (Bulb Photos), LIVETIME (Live Time Photography) and LIVECOMP (Live Composite Photography). More advanced settings are possible for live composite photography in M mode than Light Trails in SCN or Live Composite mode in AP mode. (Movie Mode) This mode allows you to make movies. In addition to standard movies, you can make 4K movies or slow motion movies. The standard of description of the mode of the film for shooting standard films. You can also make movies with selected effects: Art Fade, Old Film, Multi Echo, One Shot Echo and Movie 4K To shoot 4K movies. Clips create a single file of the film, collecting several short films. High-speed for slow motion. You can record a 30fps movie equivalent to HD HD image quality shooting in 120fps. The sound is not recorded.
