It is obtained from the Bearer of Bad News mission located in the Sanctuary. Special Effects Weapons Say No in Pain: He is no more. but they live in gratitude that it was. – Increase and variable count of explosion fire. Hip fire has a chance to fire an extra shot. Increased fire rate and magazine size. Use and description As with all Dahl's weapons in the game, the Scorpion has a burst fire mode when enlarged, but features a variable burst (5-7 when extended) instead of the common burst of 2 - 3 laps. It is very precise when you shoot enlarged and has very little recoil. Borderlands 2 Loot and Weapons I've always loved the good old Scorpion... especially with the right parts and aa... It's like an assault sniper: and it can be deadly in the right hand/cicumstances. But me and others have always assumed that a good Purple Dahl Minigun shooting 9 rounds per burst (vs. 6-7 per Scorpion burst) will hurt a Scorpion. I went to the range with almost identical parts Deep Scorpio and Deep Minigun and these images lie?? Is there anything that happens with the Red Text of the Scorpion that we don't understand? Or the Scorpion with Ar? The Minigun is only recording 3 hits, but these could be stacked hits logging simultaneously because the FR is so fast in the explosion, and 9 divided by 3 = 3 ... so this kind of makes sense. And Scorpio is recording 5 hits, with one obviously a stacked hit, so 6 hits in total. But if you add the numbers: Scorpio = 38,040K Mingun = 24.771K This is a big difference. What the hell is going on here?? 2 Likes The Scorpion has a changing burst every time it shoots. 1 How interesting ... In fact, I gave my Scorpio a two-level buff op to put it on par with my other Dahl assault rifles. Out in the lab! 1 Just as the top gear may need to change 1 As rashardcloud: The scorpion has a changing burst every time it is fired. Most of the time 5-6 shots... sometimes 7, but even 5 would hurt the Minigun if I read the correct numbers ... And this with the deep prefix and the Vladof grip that makes the burst really fast and tight. 1 As Hey john I'm loving all these test threads keep coming. Also maybe compare saying the little evie to a normal umbrage 1 like Little Evie to Shock Umbrage??? What parts??? And for this probably not farm as it might take forever... you will have to resort to software to manufacture ... Although I'm not going to keep anything they manufacture, since it just doesn't seem sporty... But for science... I'll bend a little ... LOL 2 I would like to say likely mailwan grip and powerful prefix (damage). It doesn't matter how you get them in my eyes. 1 Just like when you announce ads, the game reads the item's card as having an x3 multiplier, but doesn't initially show it as when you shoot your hip that you don't shoot 3 bullets per trigger pull. The same goes for the Fibber shotgun as x1 says on the card, and fires 7 rounds per trigger shot, but the amp is still divided by 7. So while ADSing with the Minigun the amp is divided by 3. So with and only with the aa other Dahl rifles do it that the Minigun, but all the other scenarios that the Minigun still wins. At least that's what I picked up from my test. 2 I like What is the listing damage (or the base damage of a body shot with a single round)? edit – more tests confirms @khimerakiller results of the week with amp shields, but don't think you're using those in this test? 1 How to expect were any of these questions for me? But he does have the aa like that. Johnrr6: Is there anything that happens with the red text of the scorpion that we don't understand? Or the Scorpion with Ar? You can see it in your screenshot as well. 1 As Ok. Nice captures, by the way; I would never have guessed that the minigun bursts shared the tie of the amp. 1 How ok... Kinda confirms my uneducated belief that the Scorpion is pretty good... with ant... And this tight shooting pattern and FR does it like a Skulsmasher... can only be elementary... with a huge pool of ammunition and red text helps. I ran the Beatdown with it a few times... to OP8 to confirm. If you are good with screams and have decent stop tactics because your shield stays up... and it looks better with a bad chaotic Mod. You can literally sit back and pick up enemies in the range until the cows come home. And it's an easy search gun to get... semi easy to grow for the right parts 1 As Adabiviak: Ok. Nice catches, by the way; I would never have guessed that the minigun bursts shared the tie of the amp. Yes... and kind of changes my belief about how valuable a minigun is because I would just really consider using it with an aeras. 1 As thank you for the information – the Scorpion is one of the weapons I've never found a use for – in my new play through I could give you more than just a look... 1 How I'm going to raise the question It deserves a first-team spot not looking for a big debate 1 How my vote is no. The only time it's worth using is mobbing with the aa. And I may be biased, but 95% of the time you shouldn't use the aa while mobbing. 1 I like it fair enough that I don't really want to edit much more, but I'll do it if I need to. 2 I like that I say no too. It's good, but even rather niche as KK says. But do we want to leave the mini gun? I mean split the amp damage into it really kind of hinders it. At lower levels it's probably pretty good, but from 61 on I don't think anyone will use it even for Mobbing. 1 As with scum/matching items/screams that kills fast isn't sure in body shots you should go get one to try. 1 Like the next page → FlagView Story Say No in Pain: He is no more, but live in appreciation that he was.
