Emergency reporting system ultra secure login

The business security system can include video surveillance, traffic detection, emergency dispatch and keyless access control recording. The best security systems offer transparent pricing and simple contract terms. The best small business security systems are: Simplisafe: Best overall security system for small business Vivint: Best professionally installed Wyze system: Best budget video surveillance nest: Best security system with high-quality ADT video: Best for access management and custom systems Not sure which security system is right for your business? Take this three-question quiz: Which business security system is right for you? How we evaluated small business security systems, when most small business owners think about security, they imagine a network of sensors that, when triggered, call the alarm and notify the authorities. While this is what most security systems today offer, there are also budget systems for businesses that only need CCTV you can monitor from your smartphone. In addition, many systems today are compatible with smart devices, so you can lock/unlock doors, turn off the lights, or adjust the temperature of your workplace remotely. Features and price were the two biggest factors we looked at when evaluating security systems. Professional monitoring requires a monthly fee, and it can range from as little as \$15 per month for SimpliSafe, to more than \$50 for Vivint or ADT. Similarly, some companies will require a three-year commitment, while others, like SimpliSafe, will allow you to pay month to month. Last but not least, we've also looked at the quality of the equipment (along with any warranty included), the ease of installation and the available customer service options if you need help with your system. The top 5 Business Security Systems compared to the month-to-month option available from SimpliSafe: The best overall small business security system SimpliSafe is the best choice for small businesses because it offers a high level of security, including cameras and police/fire control, at a price that often half of competitors like Vivint and ADT. SimpliSafe does not have a contract, so you can cancel or change your plan at any time without penalty. Low Cost 24/7 Professional MonitoringNo automatic timer to customize alarmMultiple hardware options Visit SimpliSafe SimpliSafe Prices Monthly Standard Plan fees: \$15 for professional monitoring with built-in cellular communication (police and fire service) Interactive plan: \$25 for visual verification Video, Alexa/Google Assistant Integration, Flood Monitoring and Temperature Monitoring SimpliSafe Equipment Equipment Price Standard Indoor Camera: \$100 Motion Sensor: \$30 Glass-Break Sensor: \$35 Installation Price Free (DIY) \$79 for Professional Installation SimpliSafe Contract Terms There are No or Activation Fees Fees Fees SimpliSafe, so you can pay month to month and cancel at any time. In addition, if you do not want to pay a monthly fee, SimpliSafe can work without professional monitoring. In this case, the sensors will trigger a 95-decibel alarm, but will not send police/fire. SimpliSafe is a wireless security system that has a built-in cellular network. SimpliSafe Self-installation Features: SimpliSafe is designed for self-installation without the need for any professional experience. Devices, such as door sensors, are wireless and attach to sticky support. The expected battery life is three to five years, and the keyboard will alert you when the batteries are getting low. Equipment: In addition to cameras, door/window sensors and motion detectors, SimpliSafe offers additional devices such as fire/smoke, carbon monoxide, freezing and flood detectors. The equipment is covered by a three-year limited warranty. Mobile app: Arm/disarm the system from your smartphone, browse security camera channels, and receive customizable notifications when sensors are triggered. Keyless Entry: Simplisafe Smart Lock allows visitors to log in using a keyboard, key fob or smartphone. You can lock or unlock the door remotely using the SimpliSafe mobile app, although this will require a \$25/month plan. Customer Service: Telephone and electronic support is available from 8 a.m. to 12:00 p.m. (midnight) ET. Vivint: Vivint's best professionally installed security system is a good security system that you can control from your smartphone. But, compared to SimpliSafe, Vivint is a step forward in terms of equipment quality and features. For example, Vivint cameras are built into the power source, are recorded in 4K HD and, unlike SimpliSafe, can be installed outdoors. Vivint also works with smart locks, thermostats and lighting, so you can fully control your workplace from a distance. However, Vivint comes with a significantly higher cost, both for equipment and installation, as well as a monthly fee for professional monitoring. Businesses should expect to spend more than twice as much for Vivint as they would for SimpliSafe. Professional Installation requiredMobile app with live channels and chat functionality Visit Vivint Vivint Pricing Monthly price starts from \$54 for professional monitoring Equipment Equipment Standard indoor camera: \$200 Motion Sensor: \$100 glass-break sensor: \$100 Installation Price Usually \$99 for a professional Vivint installation price is not standard and will vary for each business depending on location, length of contract, and credit score. Prices are higher from secondary sources, and may not be the same amount you will pay. Full equipment packages usually cost \$1,500-\$3,000 per seat. The terms of the Vivint Vivint contract offer a variety of packages ranging from month to month to five years. With a longer contract, you will usually get equipment and installation at a discount, or for Free. With a monthly plan, you will have to pay the full cost of the equipment upfront, although Vivint offers funding for Vivint's SmartHub is the brain system. Vivint SmartHub features: The central feature of Vivint is the SmartHub touchscreen, which allows you to arm or disarm your system, monitor your cameras, and talk to visitors using a two-time conversation and camera feature. Equipment: In addition to cameras, door/window sensors and motion detectors, Vivint includes the ability to install fire/smoke, carbon monoxide and flooding. If you choose a Premium Service contract, the equipment is covered by a lifetime warranty. Otherwise, it is covered for 120 days. Smart Devices: Manage compatible lighting, thermostat and smart locks with Vivint SmartHub or mobile app. It is also compatible with Alexa and Google Assistant. Keyless Entry: Compatible with Kwikset smart locks so visitors can log in with a keyboard. Customer Service: Phone support is available 24 hours at 7, and chat support is available from 9 a.m. to 2 a.m. EASTERN TIME. You can also use the SmartHub device for video chat with a security professional at any time. Wyze: The best budget oversight system If you just want to keep track of your business without a police/fire control room, then Wyze is by far the most cost-effective solution. The main camera is only \$20 and you can monitor live feeds or view past recordings from your smartphone without any monthly fees. Wyze also offers inexpensive door/window sensors, smart locks and smart lighting. To be clear, Wyze is not a security system in the traditional sense. There's no professional monitoring, and their Wi-Fi equipment isn't built as hard, and doesn't work as reliably as other suppliers like SimpliSafe and Vivint, which use a cellular backup connection. However, if you're on a tight budget, and the security system falls under a good to have category, you really can't beat the value of Wyze. Budget solution - no monthly support fee required - no SundayCustom Mobile Notifications Visit Wyze Wyze Prices Monthly Price Free version: Monitoring all cameras from your smartphone, recording on a microSD card, and storing event records for up to 12 seconds in the cloud. \$1.50/month per camera: Keeps all the footage in the cloud for a rolling 14-day period. Equipment Price Standard Indoor Camera: \$25 Motion Sensor: \$6 Glass Break Sensor: Not Available Installation Price Wyze Contract Terms Wyze does not require a monthly fee for any of its services, except for a full motion capture that records video footage in the cloud. There's no contract or activation To fully capture the traffic, so you can pay month to month and cancel at any time. Wyze Features Self-Installation: Wyze cameras and sensors are designed to be self-installed by anyone without the need for professional experience. Devices installed glue pads, and connected via Wi-Fi via the Wyze mobile app. Equipment: Wyze offers indoor and outdoor cameras, door/window sensors, motion detectors, smart locks, smart light bulbs and smart sockets (which can be turned on and off via the app). Although the price is much cheaper than that of all competitors, it is reflected in the quality of materials. The Wyze Cam V2, for example, is made of lightweight plastic. Wyze cameras are covered by a one-year limited warranty. Mobile app: Impressively, the Wyze app allows you to track all camera channels and view past records without the need for a monthly subscription. The amount of playback depends on the size of the microSD card (sold separately) with the 32GB card, saving about seven days of standard video definition. The Wyze app also lets you set up custom sensor notifications and control smart devices. Keyless Entry: Wyze Castle and keyboard can be installed to give visitors a keyless entry. Customer Service: Telephone and chat support is available on weekdays from 8 a.m. to 9 p.m. Eastern and Saturday from 11 a.m. to 7 p.m. ET. Nest: For high-quality video surveillance and smart devices, Nest specializes in high-quality video surveillance that works on Wi-Fi and does not require a professional installation. Like their close competitor Wyze, Nest also supports a variety of smart devices including smart locks and a thermostat. While The Nest has a leg up in terms of equipment quality, reliability and clarity of video streams, it is also more expensive and requires a monthly subscription of \$6-\$12. Also, while Nest does not offer professional monitoring to send police/fire in case of an emergency, it integrates with Brinks to offer this service. This will require a separate contract with Brinks Security, which starts at \$19 a month. No professional monitoringRecordings only stored 10 daysConnects with many smart devices Visit Nest Nest Prices Monthly Price Free version: View live camera feeds from your smartphone, hand/disarm your system, and receive notifications of events such as motion detection. There is no professional monitoring and no video recording. \$6 per month: Records events (such as when movement is detected) and stores them in the cloud for 30 days. \$12 per month: 24/7 record for the last 10 days, and stores events in the cloud for 60 days. Equipment Price Standard Indoor Camera: \$130 Motion Sensor: \$49 Glass Break Sensor: Not Available, but Nest Safe Base Station includes glass break detection. There is no contract required to subscribe to Nest Aware. However, if you pay for the year upfront, you can save 20% month-to-month pricing. Although Nest does not offer its own professional monitoring, it integrates with Brinks Security. Just like SimpliSafe or Vivint, Brinks will be emergency services in case the alarm goes off. Prices start at \$19 per month with a 3-year commitment, or \$29 per month for a month-to-month plan. Nest Features Self-Installation: Nest cameras and sensors are designed for self-installation. Devices connect wirelessly using the Nest mobile app. Mobile app: Nest includes a highly rated mobile app that lets you track cameras in clear HD, view past recordings and set up custom security alerts. One of its unique features is Familiar Face Detection, an artificial intelligence tool that alerts you to people who are not normally seen in your home or workspace. Equipment: Nest offers a wide range of indoor and outdoor cameras, as well as alarms, door/window/motion sensors, temperature sensors, and a combined fire detector and CO. The nest equipment is built stronger and works more reliably than their nearest competitor Wyze. Nest equipment is covered by one or two years of limited warranty depending on the device. Smart Devices: Nest also offers a wide range of smart devices including a thermostat, speakers and Google home assistant. They're all in sync with the Nest mobile app, so you can control everything remotely. Keyless Entry: The Nest Yale smart lock allows visitors to log in using the keyboard, and allows you to lock/unlock the door remotely. Customer service: Nest offers 24/7 chat support. At the time of writing, telephone support has been suspended due to the COVID-19 pandemic. During my evaluation, I was hooked up to a support agent after about 10 minutes. ADT: The best commercial security system as one of the original business security providers, ADT offers everything under the sun; From home automation tools such as smart locks and smart plugs to high-end commercial systems, including access management, ATM security and body temperature detection. Similarly, its offerings range from traditional stationary systems to ADT Pulse, which is a wireless DIY-installation system, similar to SimpliSafe. However, unlike SimpliSafe, ADT prices are opaque. It can vary greatly from one seller to another, and is usually on the expensive side. For this reason, we recommend SimpliSafe instead for most small business owners. However, if you have a big business or one that sells high value goods and requires a more sophisticated security system, ADT is the company best suited to provide it. Usually requires a 3-year contract Visit ADT ADT Prices Monthly Price \$40 for basic via stationary \$52 for cellular monitoring \$62 for cellular monitoring with CCTV Equipment Equipment Standard indoor camera: \$200 motion sensor: \$120-\$189 Glass break sensor: \$120-\$189 Installation price \$0-\$199 depending on the price of the ADT contract is not standard and will vary depending on the reseller and customer credit score. Prices are higher from secondary sources, and cannot be the same amount you will pay. The terms of the ADT ADT contract usually require a 36-month agreement, but there is a kit in some equipment with a monthly monitoring price. It can also provide a discount or a free installation. Again, conditions vary with each reseller, so there may be shorter contracts available as well. ADT Features Equipment: ADT offers all the basic safety equipment you expect to see, including door/window sensors, motion detectors, glass sensors, temperature and flood monitoring, and an alarm button that triggers a silent alarm. Mobile app: Like other security systems we've reviewed, ADT includes a smartphone app that allows you to arm/disarm the system, monitor camera channels, change temperature and lighting, and receive custom security alerts. Access control: ADT has a non-

hitsable login system that goes far beyond the other systems we've reviewed. Employees can unlock doors using a keyboard, and each card can be programmed to unlock different doors, depending on their level of design. Customer Service: ADT Monitoring Agents are available 24/7 to answer minor customer service questions or respond to warnings. Otherwise, the main customer service line is available from 7 a.m. to 12:00 PM ET. Bottom line Most small business owners are looking for a security system that allows them to monitor their business from their smartphone, but also get 24/7 professional monitoring that will notify authorities in the event of a break-in or fire. That's why we recommend SimpliSafe as the best small business security system. It offers an easy-to-use mobile app for viewing camera feeds and lock/unlocking doors, as well as professional monitoring with video verification. The price is less than half of what you will pay for a comparable system from Vivint or ADT, and there are no contracts required. Visit SimpliSafe to get started. Visit SimpliSafe SimpliSafe
