

Prentiss Taylor Jr., MD, has more than 20 years of experience in primary care, digital health, innovation, preventive medicine, medical management, quality improvement, and health care leadership. He is recently trained in Disruptive Strategy at Harvard Business School.

He currently serves as Vice President for Medical Affairs at Doctor on Demand, the leading innovative national telemedicine company. There, he is currently co-leading national health initiatives with Humana, Walmart, and several other companies. See the innovative virtual primary care health plan venture, Humana On Hand: <https://t2m.io/YX7Cxfv>.

Dr. Taylor has most recently been Medical Director at Advocate Aurora Health Care, the largest health system in the Midwest. At Advocate Aurora, he was the physician leader running the JP Morgan Chase employee health service in downtown Chicago and suburbs. He also launched Advocate's first successful Patient Centered Medical Homes sites.

Dr. Taylor is a graduate of Harvard Medical School, the Kellogg Business School, and is a Fellow of the American College of Physicians. Prentiss is board-certified in Internal Medicine and Preventive Medicine. He has been chosen as a Top Doctor by Chicago Magazine, Castle Connolly, and US News, multiple times, including in 2018. He has served as a local medical director for Blue Cross Blue Shield and for United Healthcare, prior to being recruited to Advocate Health Care.

Dr. Taylor is also proud of being selected as one of three national faculty persons for the CDC/ American College of Preventive Medicine initiative 2019-2024 focused on Reducing Hypertension in African-American Men.

He also serves part-time as Chief Medical Editor for Oakstone Continuing Medical Education, promoting evidence-based practice guidelines, providing expertise on internal medicine/ preventive medicine subjects.

Dr. Taylor has published several articles and book reviews in national journals on primary care, Medicare, electronic medical records, patient satisfaction, and cost-effectiveness. He is extensively experienced with population health, chronic illness management, Medicare Risk Assessment tools, NCQA, urgent care, and corporate employee health issues.

He was awarded the Unsung Hero Award by WGN-TV for his volunteer work at a free clinic. Dr. Taylor has volunteered as guest lecturer for the American Heart Association's Life's Simple Seven program, has spoken to church groups, and has appeared on local radio stations in support of Hypertension Awareness and Control. He is involved with three local mentoring programs for students as well as on the National Alumni Council of National Medical Fellowships, which gave him a scholarship to Harvard. Dr. Taylor is very active in physical fitness and tries to set an example for his patients in healthy lifestyles.
