Camtasia is a powerful, easy-to-use software program that lets you create and share professional-quality, animated screencasts. These screencasts can then be played on YouTube, viewed in online training courses, and accessed with most e-learning systems.

You can even post the screencast on a remote server for others to view. The screencasts are created using Microsoft® Windows®, and are compatible with most e-learning platforms and web browsers. There is no additional software required for most screencasting activities, just Windows®. Can be used to create both instructional and non-instructional screencasts. The program has features that will not only create screencasts, but also provide the option to record the input from a webcam, microphone, and mouse clicks. Camtasia is a powerful and easy-to-use screencasting program that will quickly get you up and running with animated screencasts. 520fdb1ae7
