Paradigm is a mental program that has almost exclusive control over our habitual behavior... and almost all of our behavior is habitual. Paradigms of many habits are passed down from generation to generation. Paradigms are how you see yourself, the world, and the possibilities. Paradigms are an approach to change and challenge. The part of reason that sets the goal is not the one that achieves it. WHAT you'LL LEARN at a paradigm shift workshop you'll discover how you can transform your finances, health and lifestyle when you change your mental programming-your paradigm. This workshop synthesizes decades of study, application and learning to explain what paradigms are, how they guide every step you take, how to define your paradigm - and most importantly, how to make the paradigm shift. During the two and a half days of the workshop Bob and Sandy will zero on how to replace a paradigm that doesn't serve you well with a new one that frees you to create the life you really want. Once your paradigm shifts, you will expose yourself to a whole new world of power, opportunity and promise. These are the habits of other people that are passed down from generation to generation. Everything you do from morning to night is controlled by your Paradigm. So your paradigm is your mental programming, which determines your behavior, ability to work, your attitude, and everything you do. A paradigm shift is needed to change habits that don't serve you.
