2027 CATALOGUE

Our Story

Philosophy

GS Bowman Greenhouses Ltd. is owned and operated by Glen Bowman. By using a 'down-to-earth' philosophy in both growing and selling, a family-style, hands-on operation is maintained with growers and brokers. Providing a mix of new varieties and plants with a proven track record.

Quality

We believe in providing the highest quality plugs to our customers. A large part of this effort begins with the soil we use. All plugs are planted in soil containing Trichoderma which combats Pythium, Rhizoctonia and Fusarium in greenhouse crops. In addition, our soil contains Mycorrhizal Fungi which helps all plants absorb minerals and water from the surrounding soil. The result is a plant which is better able to tolerate stress throughout the course of its life.
