Formed belt units with a bob machine shop etched in. Look great and will never crack. Sold as a pair (for engine 1) powder coating is available. Call custom colors. Offer 5 degrees of trim either negative or positive. Most cases are used to provide negative trim, when your bow will not come down enough because of the angle of the engine (transom is built without enough of a negative angle). This is a quick, cheap and effective solution! 3 is a width of 14 cm total you will need bolts that are 1.5 longer for the 'thicker side of the wedge', and 0.25 longer for the 'thin side of the wedge'. Stainless steel wedge washers are available – an addition to the item (washers come set of 4) to go behind the engine so that the nut lies flat. Description Bob's wedges are described as reversible for positive or negative trim. Formed belt units with a bob machine shop etched in. Look great and will never crack. Sold as a pair (for engine 1) black powder coated is an option. Offer 5 degrees of trim either negative or positive. Most cases are used to provide negative trim, when your bow will not come down enough because of the angle of the engine (transom is built without enough of a negative angle). This is a fast, cheap and efficient solution!3 is a width14 total length screws that are 1.5 longer for the 'thicker side of the wedge', and 0.25 longer for the 'thin side of the wedge'. Additional informationWeight11 lbsDimensions5 × 13 × 19 reviews (0) about KlarnaAbout confirmation about Katapult 22. Lukakuuta Kilo 19.12 - Eavis Please help locate this stolen search ship!!! You could help me get a word about my Mote research boat that was stolen (it has one of your jack plates). I listed a miniature poster of recent photos off craig's list site since I painted the top structure to cover our Mote logo, the company names that helped me with the boat (including your business), and florida numbers. The boat was owned by Mote, and was bought with grant funds, money collected, and donations from several companies that provided discounts or goods donated to the boat. He practically lived on it tracking and storing Redfish in Tampa Bay. The lab didn't have the owner's insurance on the boat, just the responsibility. I listed many details below, maybe too much, but maybe it will help. The investigator believes it has been sold to someone in St. Pete's. Very strange. I just happened to find it on Craig's list of searching for tower boats for sale, but they have already sold out. Serial numbers are believed to have changed and there is a fake address... Like when list vendor Craig K sold it to Sunbird instead of Tran Cat. I'm not a social media person, so any help to get a word to your great family of captains and recreational hunters would be very helpful. Please let me know if you have any questions, or if you need to write this down differently. Boat Theft - 21'2002 Tran Cat made in Palacios, Texas by Tran Sport. Call Bradenton Police 941-932-9300. Case 2020-5621. Stolen in Bradenton and sold on Craig Sarasota/Bradenton's list, September 2020 as a Sunbird boat. - Cat body, white w/ (Craig seller list painted) dark blue or black plated upper structure. The deck was light gray, black patches - Sportsman trailer w/ wooden slides, may have new carpet on the slides, 2 piece rubber adjusted bow guard, oval LED led light poles trailer lights, u bolt under the bow structure for cinch safety belt, stainless steel eye bolt on trailer. - Double tower steering stations, port-side access tower ladder - Redfish w/ pillar roots on console tower - 4 tower holders bars down astral plank, 2 or 3 rod port side owners - 2002 Mercury Optimax 150 HP engine, red stickers and wide - Bob Shop Jack Machine The panel - white power pole astral side - Min Kota 80lb orientation trolling astral arc engine - down the seat console moves back from front to back, top seat console flips up and down - 3 stern w booths / round silver rings to turn and pull up, locks may now be removed. - Port Cabin Cabin Stern Jack Hydraulic Fluid Container Panel - The Middle Stern Cabin Lives Well, Black Round Switch Just Above deck. - 3 bow compartments on ~6 raised deck - they remove blue umbrellas on the back of the tower roof. - White flood lights rear of the tower and the front above the lower console - faded plastic windshield redfish sticker - snaps on the inside of the standing tower platform Wrap the screen. - Black heavy plastic cleats - bottom of the front compartment console, 2 pull rings to turn to open. - Inside the plastic control unit yellow gas tank, no cabin door. - Barbed fiberglass tube from the right deck of the gas tank of the floor to run the cable - the side-off edge trailer. - The upper edge of the black tower section on each outer side of the seat of the attached top shade. - New Garmin Echomap Plus 94SV down console Thank you very much, Death Marine Labs please contact brandton police 941-932-9300 with case #2020-5621 very good reason 22.
