Techniques for solving synonyms / antachem questions 1) on the hardest synonym /antonym questions, beware of trick options. Can you spot the trick in the following example? Choose the best Antonom. RESTIVE: A) Patient b) Strict c) Deceptive D) E) Active E) Word caution, troubled, is difficult, because it seems to have to do with comfort. Therefore, Active D will be better Antonomie. However, this is a trick. troubled actually meant restlessness. So, the correct answer is patient, antonom good for anxiety. It is useful to recognize difficult words like troubled, because they are usually tested on SAT and GRE. 2) Takes positive and negative note questions charged options. It is possible to link a negative or positive charge with almost any particular word. Try to highlight whether each word in the following list contains positive (+) or negative (-) or (=) charge. Choose the best synonym. Maligned: a) beneficent B) magnanimity c) D) oppressed D) The destitute E) elegant in the example, we are trying to find the best synonym for malicious word. So, we need to start by making sure you're being charged. Prefix, mal is commonly used in negatively charged words. Therefore, the answer will probably be a positive charge. Let's go through the menu to see how each word is shipped. a) beneficent (+) b) gentleman (+) C) oppressed (-) D) destitute (-) E) elegant (=) after marking both, we are up with two words that are positively charged: benefis and magnanimity. Even if you don't know the meaning of any answer options, you've narrowed your choices to two and remain with a 50% change of answer correctly. This is a quick technique that can be very useful when trying to answer a question with several words that you are unsure of. 3) Eliminate answer ing options that have no obvious antonom. This technique only works on the combined questions. Therefore, this is a great technique to use on GRE because it only contains Antrim questions (contains no synonym questions). Consider rounded or planned words. None of these words have a clear fairness. While almost every word has a synonym, remember that not all words have a defeat and eliminate them first. 4) Eliminate answer ing options that are close synonyms. Discovering synonyms within the answer options can be valuable because it allows you to narrow applicable answer choices. If two answers have very similar meanings, but the correct answer is very vague. Therefore, it is possible to eliminate these options. SAT/GRE tests are difficult, but they always offer one answer option that is clearly correct. See if you can delete two options from the answer from the following example. Choose the best Antonom. FOMENT: A) Dilution of B) generate C) Check D) Calm Down E) Full of softening and calming words are close synonyms. Both mean to reduce or soften in pain or distress, to make less severe. This leaves only three applicable answer options. 5) Try linking the word with a familiar context. Words are tested on SAT/GRE for a good reason: they are very effective. This is the case, getting included in many proverbial phrases. Note the following examples: Gale's power winds, village lawyer, testing your fragility, the road to doom, patience, virtue, extreme poverty, he has passed unscathed. 6) Use your knowledge of romantic languages. The roots of many SAT/GRE words have similar meanings in foreign languages. For example, the Spanish word Malo means bad. This is the common root of many negatively charged words: the malicious male male malpropos and malicious masculinity are harmful and male in addition, the Spanish word bueno means good.
