

The Rolling Stones - Tops

[Spicy Filters from BeWellPlayed.com](http://BeWellPlayed.com)

Hey baby
Every man is the same come on
I'll make you a star
I'll take you a million miles from all this
Put you on a pedestal
Come on, come on

Have you ever heard those opening lines
You should leave this small town way behind
I'll be your partner
Show you the steps
With me behind your tasting of the sweet wine of
success

Because I'll take you to the top, baby
Hey baby
I'll take you to the top

Step on the ladder

Toe in the pool

You're such a natural you don't need no acting school

Don't need no casting couch

Or be a star in bed

Never, never, never let success go to your pretty head

Cause I'll take you to the top, baby

I swear we'll never going to stop, baby

I'll take you to the top

Don't let the world pass you by

You better take your chance now baby

Or be sorry for the rest of your sweet loving life, baby

Oh, sugar

Hey sugar, I'll take you to the top

I'll take you to the top

I'll take you to the top, sugar
