The 11th Decorated
Terra-cotta
Concours
第11回 飾り瓦 コンクール

応募用紙

整理番号		審査番号	
応募者氏名	ふりがな 男 女 (歳)		
作品名	ふりがな		
応募者住所	〒□□□ - □□□□ 電話 ー ー 携帯 ー ー		
職業・勤務先 学校名(専攻学科)	() 連絡先電話 ー ー		
焼成希望	有り	無し	
焼成方法 (焼成希望ありの方)	① いぶし焼成	② 素焼き	③ 釉薬焼成(黒色 茶色)
作品コンセプト (簡単に書き下され)			

● 応募につきましては、①【作品】と②【応募用紙】と【写真】の提出。
③【登録料】の納付をもって、正式応募者として登録します。
● 整理番号・審査番号欄以外は全て記入下さい。
● 住所・氏名・電話などを念のため不都合の方はお申し出下さい。
● 応募作品の持帰権は、次回開催まで実行委員会に所属するものとします。
● 応募者の個人情報は、適切に管理いたします。

The 11th Decorated
Terra-cotta
Concours

第11回 飾り瓦 コンクール

屋根・庭のオブジェ

応募期間
平成28年10月24日(月)～平成29年1月20日(金)

主催
「飾り瓦コンクール」実行委員会
実行委員会構成団体
全国陶器瓦工業組合連合会
愛知県陶器瓦工業組合
三州瓦工業協同組合
愛知県瓦瓦技能評価認定協議会
三州瓦瓦製造組合
三州瓦瓦白地製造組合
三州瓦白地組合
三州瓦伝統技術保存会
協力
高浜市やきものの里かわら美術館
碧南市藤井達吉現代美術館

後援
愛知県 高浜市 碧南市
一般社団法人全日本瓦工事業連盟
全国いぶし瓦組合連合会
高浜市職工会 碧南職工会連所
中日新聞 朝日新聞 読売新聞 毎日新聞
中部経済新聞 日本経済新聞
キヤッチネットワーク (協賛)

協賛
三河製土協力会 西三粘土協同組合
日本瓦師の会 高浜市観光協会
碧南市観光協会 三河陶器協同組合
金美知製陶瓦工業協同組合 他 (協賛)

The good news is that its developers seem to be listening, because they just released Beta 9 with a new feature to make Pyro more easily portable: native zip and tar archives. Features : Working code which works, very minimal effort to put a real Python GUI on top of it, A Linux binary distro of your own, The source code which is also good and free. Support for compressing the data being transmitted over the Net, Support for compressing the data being transmitted over the Net, Support for compressing the data being transmitted over the Net, Support for compressing the data being transmitted over the Net, Support for compressing the data being transmitted over the Net, Pyrotech Download Code Features in rosala. PythonnNo attached data sources. It works, but it's slow and the files are very unoptimized. The good news is that its developers seem to be listening, because they just released Beta 9 with a new feature to make Pyro more easily portable: native zip and tar archives. Features : Working code which works, very minimal effort to put a real Python GUI on top of it, A Linux binary distro of your own, The source code which is also good and free. Pyrotech Pyrotech is a software application that can take advantage of the free network utility programs available in the Linux operating system to create large volumes of compressed data that can be then easily and efficiently transmitted. From simply writing a file that gets automatically compressed by Pyro when the file is written to the network or received, to automatically recording long files in their most compressed and efficient form, Pyro can be used to produce impressive compression rates, both in time and space. Pyro is based on the free and open source compression software, ZIP, which was originally developed by Phil Katz of STX Software as part of the ZIP project. It has been included with some Linux operating systems from very early versions. It is not, however, actually a part of the operating system. Pyro takes advantage of the free network utility programs available in the Linux operating system to create large volumes of compressed data that can be then easily and efficiently transmitted. From simply writing a file that gets automatically compressed by Pyro when the file is written to the network or received, to automatically recording long files in their most compressed and efficient form, Pyro can be used to produce impressive compression rates, both in time and space.
