Socratic dialogue controlled, highly structured collaborative educational activities for use in introductory lecture courses of astronomy. Designed to evoke students' misconceptions, confront their naive, incomplete or inaccurate ideas, resolve contradictions and demonstrate the power of conceptual models. Activity overview Students work through a lecture worksheet in a lecture after an interactive lecture on a topic covered by the lecture-tutorial. Each lecture-tutorial takes 10-20 minutes. When working on a lecture-tutorial, students should: Work with a partner. Read the instructions and questions carefully. Discuss concepts and your answers with each other. Build consensus on your answer before your group moves on to the next question. If you're stuck or unsure of your answer, check with a nearby group. If you are really stuck or do not understand what the tutorial asks, raise your hand and ask for help.
