nový vzhľad a dojem - pridané Nedávne zobrazenie - vylepšená funkcia vyhľadávania - lepšia indikácia stavu informačného kanála - vylepšená podpora zvuku a ovládania prehrávača na pozadí - podpora otáčania displeja - a ďalšie prísť v nasledujúcich vydaniach v tomto roku

===== Bývať v blízkosti letiska a chcete zistiť, čo sa deje? Have you always wondered what pilots are talking about with air traffic controllers? Now you can stop thinking and tune in live! LiveATC for Android provides a quick and easy way to listen to live conversations between pilots and air traffic controllers near many airports around the world. LiveATC for Android allows you to browse by U.S. state or country to find an airport and listen to live conversations about air travel at or near a given airport. You can also use the Nearby feature to find an airport near you. You can then add any channel to your favorites list for quick and easy access. LiveATC Network ( ) is the world's largest air-focused network of streaming audio channels, covering more than 700 airports worldwide with over 1,000 different audio channels and growing daily! Explanation of some necessary device permissions: • Location permission requires the app to find out which airports are in your area when you select Nearby • The app needs device ID permission and call information to see when you're placing or receiving a phone call to prevent it from interfering with your phone call **\*\*\* IMPORTANT WARNING \*\*\*** Check at: . Note that we currently have no coverage in the UK, Belgium, Germany, Iceland, Italy, New Zealand, Spain and some other countries where ATC streaming is prohibited by local law. Available airports can change at any time - LiveATC owns and operates many receivers used in the network, but most are provided by volunteers working in partnership with LiveATC. Available airports may change, sometimes for reasons that cannot be controlled. Also, there is no guarantee that all channels will be up to 24/7, although we are making our best efforts to do so and have a great record of uptime. Follow LiveATC for streaming updates and breaking air and ATC-related news: Twitter: Facebook: Internet Allows internet network access. Access Access location Allows access to an exact location from location sources such as GPS, mobile towers and Wi-Fi. Wake lock Allows you to use PowerManager WakeLocks to prevent the processor from ingesting or locking the screen. Access network status Allows access to network information. com.android.vending.CHECK\_LICENSE permission to the application customer. net.liveatc.android.provider.READ\_DATABASE permission to the application customer. Status read phone Allows read-only access to the status of the phone. Receive boot completed Allows you to receive a boot completion notification that is broadcast when the boot is complete. com.flightaware.android.liveFlightTracker.provider.READ\_DATABASE permission to the application customer. Live near the airport or enjoy plane-spotting and want to tune in to the pilots and control tower? Have you always wondered what pilots are talking about with air traffic controllers? Now you can stop thinking and tune in live! LiveATC Air Radio provides a quick and easy way to listen to live conversations between pilots and air traffic controllers near many airports around the world. LiveATC Air Radio allows you to easily browse by U.S. state, Canadian province, or by country to find airport interest. Once you find an interesting channel just add it to your favorites list for quick and easy access! You can also use Nearby to find airports near you. The LiveATC (www.liveatc.net) network is the world's largest network of streaming audio channels focused solely on aviation-related communications, currently covering more than 1,200 airports worldwide with over 2,000 different audio channels and growing every week! **IMPORTANT \*\*\*** Make sure that your country, city and/or airport of interest is covered by LiveATC \*BEFORE PURCHASE\* - check at: . Note that we do not have coverage in the UK, Belgium, Germany, Iceland, Italy, New Zealand, Spain and other countries where streaming ATC communications appears to be prohibited by law. Available airports/channels can change at any time - LiveATC owns and operates many receivers used in the network, but many are provided by volunteers. Available airports can change many times for reasons that we cannot control. For this reason, there is no service guarantee – and there is no guarantee that any particular channel will be up to 24/7, although we are doing everything we can to do so and have good results in uptime. Follow LiveATC for transfer updates and breaking aviation and ATC-related news: Twitter: Facebook: Screenshots Reviews Very good application. Quite an impression. Continue adding more airports to the list. It would be nice if you could add airports in India and the UAE's BEST airline based apps in the App Store. It would be nice if there were Indian towers. U should have Indian radio as well.. We're looking forward to it..
