Why do some students fail and others succeed?

Engaging students through their devices

- Instructors gain insight into students’ learning, starting at the student-by-student level and rolling up to class, course, department, school, university administration, and overall school district levels. Easily see at-risk students!

- Increase students’ grades by matching course content with their notes, annotations, highlights, polling answers, and instructors answers. Students can also play back recorded class lectures.

- Leverage techniques and technologies that are familiar to students and instructors. Existing computer-generated presentations and built-in tools, such as PowerPoint, Keynote, smart boards, or smart projectors can continue to be utilized. No need to re-invent the education process!
WHY NOTEAFFECT?

Our engagement rich app helps students succeed while giving instructors valuable insight.

NoteAffect Features:
- Engage with PowerPoint, smart boards and more
- Real-time slide control
- Add notes to presentations
- Highlight areas
- Draw in different colors
- Collaborate with colleagues
- Record lectures
- Polling features live and post
- Social Q&A
- Powerful analytics
- Integrates with your LMS
- Delivers ROI

Interactive learning at its best!
