LIGHT TACTICAL
SNIPER RIFLE

DVL-10M2

“URBANA”

DVL-10 M2 is a version of the DVL-10 rifle. This is a light tactical sniper rifle for many applications.

Portable and fairly lightweight, DVL-10 M2 may be a good urban or a police sniper rifle, but as well will fit the highest military or special forces demands - everywhere where good mobility and the highest LOBAEV accuracy are needed.

As a light and high-precision weapon, the M2 rifle can be used for sporting purposes.

For special tasks, the DVL-10 M2 is easily transformed into suppressed DVL-10.

This Lobaev's rifle uses the COUNT bolt group. The new bolt group uses a smaller aluminium chassis and compound. This leads to better anti-vibration characteristics of the weapon.

The DVL-10 rifle has a SVL standard foldable stock.

The rifle has a heavy stainless steel barrel manufactured by LOBAEV Hummer Barrels. Only basic barrel contours are used.

CALIBER

.308 WIN/**6.5-47** LAPUA

MAXIMUM EFFECTIVE RANGE

1300 m (6.5-47 Lapua)

TECHNICAL ACCURACY

0.38 MOA/**11.5** mm between centers
(5 shots at 100m)
