SNIPER RIFLE

DXL-3

“LONGSTRIKE”

DXL is a unique long-range precision rifle built on a unique modular aircraft aluminum frame. It has all the advantages of the classic design (hardness of the bedding compound). But at the same time it is made of aluminium that is highly appreciated by many shooters.

Due to this we are certain that we have took the best of the two systems. This rifle shows more than impressive precision and works very well in most extreme conditions.

Philosophy behind this model design is maximum possible range in a particular caliber.

With all that you don't have to solder retina when shooting .338 Lapua. Other rifles owners can be busy looking for good ophthalmologist, not you. The DXL-3 recoils is comparable to 6PPC or less and you can train as long as you want to. With no risk for your valuable health.

For this model we have designed a new magazine bolt action – DUKE, based on KING family of SVLK rifles.

The aircraft aluminum stock is foldable to provide portability with longer barrels.

What completes the picture is the heavy stainless steel barrel manufactured by LOBAEV Hummer Barrels.
