ULTRA LONG-RANGE  
RIFLE

# SVLK-14S

TWILIGHT

**CALIBER** .408 CT / .338 LM / .300 WM

**MAXIMUM EFFECTIVE RANGE (TESTED)** 2500+ M

**TECHNICAL ACCURACY** 0.3 MOA/9 MM BETWEEN CENTERS (5 shots at 100 m)

**OPERATING TEMPERATURE RANGE** -45/+65°C

**MUZZLE VELOCITY** 900+ m/s **LENGTH** 1430 mm

**TRIGGER PULL** adj. 500-1500 g **HEIGHT** 175 mm

**BOLT HANDLE** right **WIDTH** 96 mm

**BOLT ACTION** right **WEIGHT** 9600 g

**MAGAZINE** none **BARREL LENGTH** 900 mm

SVLK-14S IS A UNIQUE SNIPER RIFLE SHOWING OUTSTANDING PERFORMANCE FOR MORE THAN 6 YEARS AT RANGES WELL EXCEEDING 2000 METERS. IT'S POWER, ACCURACY AND EXTREME RANGE IN YOUR HANDS. THE PRECISION CHARACTERISTICS OF THIS MODEL LINE SOUND ALMOST UNREAL AND YES, DARING. SVLK-14S RIFLE OWNERS OFTEN GET SUB 0.2 MOA 5-SHOT GROUPS. AND ALL THIS WITH SUCH POWERFUL ROUND AS .408 CHEYTAC THAT HARDLY ANYBODY CAN MAKE SHOOT. WE COULD.

The newer model has a carbon fiber-reinforced "sandwich" of plastic, fiberglass and kevlar that is specially designed for the powerful Cheytac round. A long aluminium alloy chassis is integrated into the stock - to provide increased firmness and stability. Core of the model is our highly reputable KING v.3 action made to the strictest tolerances in the industry. Precise and unbreakable. KING is aircraft aluminum body receiver with stainless steel threaded insert with stainless steel bolt.

This SVL model is intentionally left with single-shot action to provide needed stiffness for Ultra-Long range as well as versatility of having several different boltfaces in one rifle (Cheytac, Supermagnum, Magnum).

Sporting new design multi-layered composite stock, made of carbon fiber, Kevlar and fiberglass sandwich. Even more reinforced than before - long and specially shaped aluminum chassis added for more rigidity and use of most powerful cartridges. Cheek-piece mechanism has been also changed towards more shooter friendly design.
