Fortunately, you can get the modified version of Musixmatch Premium from third-party sites like us for free and start your excellent music experience without having to pay a single dime. Download the latest version of Musixmatch Premium APK below: Features Identify an unknown song Many times you may have encountered situations where you cool down at a café, or enjoy drinks at a social club and you happen to hear an unknown song. I have fallen victim to such circumstances which have left me very annoyed and stressed. But Musixmatch Premium comes with a smart song recognition feature that offers a solution to this frustrating problem. All you have to do is open the program and click on the Identify tab placed on the logo while the music is playing in the background. In a matter of seconds, the song will be accurately identified, and the lyrics will also appear if you intend to sing together without embarrassing yourself. Translate the Musixmatch Premium lyrics allow you to translate any song, composed in another language, into the language you want for you to understand the lyrics and the message. Offline lyrics You can sing out loud in the shower or practice your karaoke routine in front of the mirror, yes, the latter is a common habit for me, but sometimes I don't remember all the lyrics well. Trying to access the texts, many once I would find out that without an internet connection, I couldn't get them and it would force me to mumble out of the verse and do away with what Got. With Musixmatch Premium, you can listen to any song and access the lyrics even without an internet connection nearby. This feature is not only convenient for the user, but it also saves a significant amount of data that would have instead been used to download the lyrics to each song in your music library every time you play it. Floating lyrics The FloatingLyrics feature is a window that displays the lyrics to a song when it plays in the background or music player. This feature makes it easier for users to multitask because they don't have to switch between the music player and the Musixmatch Premium app. They can even access another app, such as WhatsApp, and still listen to music while reading the correct lyrics. The window automatically appears on the screen when a song starts playing, and you can perform all the basic Musixmatch Premium features like translating lyrics and identifying unknown songs as well as sharing. Add lyrics Some songs may not be as popular as others, making their lyrics hard to find in the Musixmatch catalog. However, if you have a favorite that you can't find the texts to use the app, you can always rewrite them for the Musixmatch catalog, and they will be added to you and many other users who will listen to the same track. Discover a great community Discover how you can participate in building one of the world's largest song catalogues by joining the Musixmatch Premium community. It is a platform consisting of over 6 million users and more than 40 million texts. Here you can become a curator, find answers and suggestions for all your problems, sync, review, translate, tag, add and even report incorrect texts. The community joins millions of users together and allows them to share their favorite texts and participate in expanding the platform. Song info and cover art With Musixmatch Premium APK, you can access all information about any song, including the artist/artists involved in its composition. Also, no one likes to have a track in their music library that has no cover art or image to make it look legit. You can download the cover for all your songs using the app and make your library more exquisite. Custom lock screen You can play, pause a track, and even skip a track from the lock screen without having to open it up. By activating the custom lock screen in the settings, you can also display synchronized lyrics on the lock screen when the track is playing without the need to unlock your phone. Select your music source Users have the option to select the source of their music using the Musixmatch Premium app. They can either settle for their music library or the largest music streaming platform, Spotify. Musixmatch then synchronizes the lyrics to the songs from selected source.
