Here's what medical students say about us: AMBOSS is a resource we've been waiting for - its integrated platform has helped me learn smarter and set a new personal best. - Michelle Lundholm, Feinberg School of Medicine at Northwestern University I used AMBOSS for the first time on my neuroscience shelf and scored the highest I've had all year (95 percent). The difficulty of the issues, the excellent explanations, and the breadth of the bank adequately prepared me to work well on the day of testing! - MS3 Student, Creighton University School of Medicine Selection and Engagement Tips excellent. They are a push in the right direction to encourage critical thinking. This is especially important at the beginning of the clerk, when the knowledge base is not so strong ... no one does that. -Michael McClurkin, Harvard Medical School Conditions: Top Pcmac Reviews Experience experience question amhammoud5 (pcmac user) The bank question is great, and I like integrating it with medical bank knowledge, but there are dozens of links in every answer when I review my test and I can't move between questions or scrolling the answer selection without hitting one by accident. Links should only be programmed to work when intentionally clicked, as opposed to when my finger slides on them. Links in general are not a problem and are often useful, but this is a real quality problem for me as I use this app on my phone. In addition, checks your internet connection every time you open it whether it's on a loaded set of problems or not. It should check the connection and not give up if there is a non-functional WiFi connection. This makes it difficult to use the app on the plane, for example when you're in airplane mode but connected to limited Wi-Fi. Easily the best regiment training yes, UWorld has great questions and explanations and Osmosis has great videos (I paid for both), however, Amboss provides the best overall learning experience. The questions are well written, the explanations are thorough, and best of all, you can click on all the keywords to get a short definition or link to a learning app to get detailed information. Worth every penny! I would love to have Amboss during my M1 and M2 years! Big font!! I love qbank would like to use it on my phone as well, but can you let users change the font to make it bigger? Just got the app, but please add the imagine button feature! Just got the pot seems good so far, but please add the send button feature. The answer to the question is based on choosing the first answer you choose, so if you accidentally click the wrong answer choice, you can't change your answer before sending. There should be an send button to prevent you from sending a random response. Choice. amboss offline pdf free download
