Canon speedlite 580ex ii

Home introducing new flash machine flash accessories Pricelite 580EX II has a GN of 190ft (58 m) in ISO 100 (focal length 105mm). In addition, Canon provides this device with other features such as computer sync, auto mode, and water resistance. This product is currently distributed throughout the Far East Shop system. Canon Speedlite 580EX II Flash Design has a total of 8 control buttons, 6 custom buttons, power arm. If you are attached to a compatible camera, it will be modified through the camera system. Canon Speedlet display 580EX II is a clear LCD screen, size, and font width. The LCD screen will light up and turn green when using the device covered in black, and the battery compartment is located on the right side of the device. Requires the use of 4 Canon Speedlite 580EX II AA batteries. Speedlite 580EX II features flash that supports TTL formats with canon's latest E-TTL II functions. With this flash, you can take a beautiful, standard shot, clear all the details in high contrast lighting conditions. Canon has focused on the Speedlite Connection 580EX II, when it can receive and process signals through lenses, in connection with automated technology with the second E-TTL system of various Canon cameras. The Canon Speedlite 580EX II is able to connect to all generations of Canon Digital SLR cameras. With auto mode of Speedlite 580EX II, you can use it on many models. When Nikon is connected to a compatible camera, the Canon Speedlite 580EX II measures the distance from the subject to the camera, then automatically adjusts the intensity of light and then gives the correct light to dimensions, reflection, the composition of the subject with dust repellent design, water, wet air, long lamp life, Canon Speedlite 580EX II has added good control function with settings of the camera menu (EOS-1D Mark III) and connects to the camera body quickly. Canon Speedlite 580EX II Flash exposure modes such as E-TTL, E-TTL II, TTL and manual mode give users more options while running. In addition, the Speedlite 580EX II has a built-in set of 45-point focus and catchlight that makes it easy to get light quickly. Canon Speedlight 580EX Accessories Comes with warranty card, manual, mini stand, soft upholstery bag (bag made of high-end plastic and bo materials that resist the shock of the machine). The Canon Speedlite 580EX II has the best inherited features of existing models and adds improved functionality to digital photography. A more powerful flash with 190ft (58 m) GN (58 m) in ISO 100 (105mm focal length), faster light resistance, more color when hitting the lights is more convenient and more control for all photographers. The premium version 580EX II has been improved more than the previous version 580EX. It has been redesigned to fit the EOS-1D Mark III in terms of dust, water, durability and lamp life, for good control of settings from the camera menu (EOS-1D Mark III). Other features include improved body connectivity and 20% shorter battery life than 580EX. Flash supports all TLL formats, including the new E-TTL II function developed by Canon. Create good conditions for photographers to shoot in high-contrast environments, and typical light inverter objects during wedding shoots. The photographer can capture every detail of the dark color from the groom's suit to the bright white of the bride's dress, both smiles, etc. The Canon Speedlite 580EX II is compatible with Canon's E-TTL II system cameras (receiving, processing signals through lenses, exposed to automated technology). When paired with a compatible camera (EOS-1D/s Mark II, Mark III, 40D,50D, 5D, 5D Mark II,....) and the appropriate lens, the E-TTL II system measures the distance from subject to camera, then automatically adjusts the intensity of light and then gives an accurate light regardless of size, reflection, subject composition. Main modes: E-TTL, E-TTL II, TTL and hand-tuning mode. The lamp recovery time is up to 25% faster. The built-in focus support system consists of 45 points. Catchlight allows you to capture light quickly and easily for taking photos. Come to Digi4u to join some canon lights.
