Guiding You Through the Prosci Methodology

You will progress through the Prosci Methodology focusing on the people side of change to achieve successful outcomes on each of your projects. Proxima is specifically aligned with the Prosci 3-Phase Process, guiding you through the activities in each phase. Here’s what this looks like.

Phase 1 – Prepare Approach

In this phase you complete activities to define success, define impact and define approach. These activities help you develop a customized and comprehensive approach that positions your change for success. Proxima guides you through activities such as completing an initial PCT Assessment for a baseline of your project’s health.

Phase 2 – Manage Change

In the second phase you complete activities to plan and act, track performance, and adapt actions. These activities involve developing formal plans and actions that help move individuals and the organization through ADKAR transitions. In this phase, Proxima guides you through activities such as developing an ADKAR Blueprint and producing a Sponsor Plan.

Phase 3 – Sustain Outcomes

This phase establishes the approach for ensuring that the change is adopted and the organization is committed to doing what’s needed to sustain the change. Related activities are designed to review performance, activate sustainment and transfer ownership. In this final phase, Proxima guides you through activities such as reviewing PCT scores and ADKAR outcomes.
