Open the F1 Manager 2001.apk file and check for "secure mod" in the properties and tick it.f1manager with mod or without mod is the game.With the F1 Manager with Mod you can create car and driver. F1 Manager MOD F1 Manager MOD, play this racing game for free with stunning graphics and over 100 cars.The present invention relates to data processing systems, and more specifically to techniques for controlling data transfers between memory and a processor. Dynamic random-access memory (DRAM) devices are accessed via control signals that are generated in response to external control signals and other DRAM status signals. The control signals include a row address strobe signal (RAS), a column address strobe signal (CAS), and a chip select signal (CS). Other DRAM control signals include data valid signals (DQS) and a multiplexed data strobe signal (DQS\_MUX). A conventional DRAM memory controller generates DRAM control signals in response to an external control signal. The control signal may be, for example, an externally-generated chip select signal CS. As part of generating the DRAM control signals, the DRAM controller typically generates a chip select signal. The chip select signal provides an indication that a memory chip to which the DRAM controller is connected is active. In response to receiving the external chip select signal, the DRAM controller generates the control signals CS, RAS, CAS, and the like.]]> isn't even that awesome 05 Nov 2008 12:31:04 +0000 sure you're all waiting for me to tell you what an amazing product the iPhone is. I just don't think the hype surrounding the product is completely justified. As the only user of the product so far, I can honestly say I don't like it. Apple has made a good product, but it's not good enough to get my business. 520f0b1ae7
