Brother serger 1034dx

When two machines manufactured by the same company are rated 9.8 and 9.6 out of 10 by serging and sewing enthusiasts and professionals and industry reviewers, that's impressive. When it happens more than once, it's time to invest in one of them. The Brother 1034D came first on the market and remains one of their best machines, in performance and sales. The 1034DX was released a few years later with just enough design changes to make it interesting and as useful and efficient as its predecessor. Choosing one or the other is the problem. The big differences At first glance the machines look like twins, but anyone familiar with both models can immediately spot the differences, which are a combination of function and cosmetics. When it comes to overall quality and ease of use, either serger is an excellent choice, especially for entry-level users. Location of control dials This difference may not seem large, but it can have a clear effect on how easy it is to use both machines. On the Brother 1034D, the dials and embroidery length dials are on the left side of the machine, while on the 1034DX they are on the right. Left-handed users may tend to use the 1034D more easily, while right-handed users may prefer the 1034DX. Also on the 1034DX, the adjustment dial that controls the stitch width is right next to the trim trap. On the 1034D, the same control is on the outside left side of the serger. The lamps lighting the machines also differ in that the D uses a light bulb, while the DX features a brighter LED light. Another small difference is the stitch lengths of both sergers: the 1034DX produces stitch lengths of between 2mm and 4mm, while the 1034D has additional options. In addition to the 2mm to 4mm overlock stitch, it can be adjusted to produce a 1mm to 2mm narrow stitch and a 1mm roll stitch. Some things stay the same The main functions and functions of both machines are almost identical. Both contain a differential feed, color-coded thread, 22 miscellaneous stitch functions and can produce 1,300 stitches per minute. They are both 3/4 thread machines with two needles that offer superior stitch quality on a wide range of fabrics, including denim. Both models come with free telephone support for the life of the machine and a 25-year limited warranty. Most importantly, both also offer a track record of reliability, durability and high-performance results. Latest comments When comparing both machines, it's important to remember that it's all about being a little more comfortable to operate. Some people can adapt a machine that might not be as ergonomically suitable for them as they would like. With the Brother 1034D and 1034DX, there's really no need to make adjustments in the way you prefer to work. Just choose the one that suits you best. The good news is that if you're left-handed, you might be lucky: the is usually priced at about \$100 less than the 1034DX. The Brother 1034D has been considered the reference point against which all entry-level machines have been compared for many years. Now the Brother 1034DX is also on the market. It clearly possesses all the excellent qualities of the original ... and a few of his own. Pros Ease of use: Unlike some sergers, the Brother 1034DX is easy to set up, thread and use. Multilingual DVD and manual: Both the DVD and the manual provide information in English and Spanish. Removable trimming trap: Easily detachable trap collects dust and wire. Affordable price: There is no skimping on additional features and accessories with this serging machine. Cons Stitch Restrictions: This model does not have chain stitch or cover stitch features. The clues are hard to find: The clues for oiling the machine are hard to find behind the user manual, which can be missed. This may cause problems with the machine as it must be oiled before it is used. Controls on the right: See the Brother 1034D for controls on the left or a comparison of the Brother 1034D Vs 1034DX. Price compared to the 1034d: More expensive than the comparable 1034D. Where to find the best value review The machine as fast and efficient, allowing users complete control when working on rough edges. The arm can be easily removed to easily place a professional finish on cuffs, sleeves or trouser legs. Loading the thread is quick and easy, whether it's re-threading or making a quick color change by binding to a new color. The stitch width can be controlled at the touch of a dial and this model has a wide range of stitching styles and special stitching functions. Stitch Options The stitching features and options on this serger are almost unlimited. The stitch wide can be adjusted by simply turning the dial to the setting you want - between 5.0mm and 7.0mm from the left needle. This feature ensures better control over all types of fabric and weights by keeping the fabric flat and easy to handle. This model features 22 stitch features - 4-thread overlock, 3-thread overlock, ribbon lock and rolled-up zoom stitches just to get started. There are several special stitches just perfect for bridal, heirloom and formal clothing and home décor items. Making the stitch adjustments simple is part of the machine's design. Specifications Speed: 1,300 stitches per minute wires: 3-4 Color coded: Yes Light: Bright LED Presser Foot pressure adjustment: Yes Product features retractable knife Knife The 1034DX serger contains a built-in retractable blade that neatly trims the edge on all your projects while it's of the fabric layers perfectly. When working on projects that don't require an edge, the knife can be quickly and safely retracted into the machine. This feature, which can be invaluable for a busy seamstress or at home designer, is rare or non-existent on many other sergers. Threading in addition to well-written instructions and an extensive video, this machine includes a fully numbered and color-coded dual (upper and lower) looper threading system. The ability to work with three or four threads increases flexibility and efficiency. For example, using two needles and four threads will create a strong overlock seam on heavier woven fabrics, while knits and lighter fabrics might only have three threads and a needle. Lower Looper Threader Along with the 3-4 lay in threading system, this model includes a user-friendly lower looper threader feature. Differential feed This welcome function determines how the feeding dogs guide the different types of dust through the machine. Being able to change the feeding dogs ensures even, smooth stitching on all fabrics. By simply turning the dial, you avoid puckers or make high-quality slarands or gathers. Warranty The 25-year limited warranty includes free telephone support for machine life. Click here to see Brother 1034DX Serger Prices, photos and reviews on Amazon! Verdict The 1034DX is an invaluable, reasonably priced machine that offers a wide range of features that are usually only found on more expensive models. Whether you are a beginner or an expert serger, this machine is well worth the investment. In addition to being easy to thread and use, this serger includes the ability to retract the blade when it is not needed. This machine serges like a dream. Read our ultimate guide on how to find the best Serger Brother is one of the first companies that comes to mind when we think of top quality sewing machines. Brother, a long-term producer of fully equipped automated sewing machines, is also known for its consistency and sturdiness of their products. The Brother 1034DX is no exception, as it works efficiently on a wide range of fabrics and fits most purposes, from beginners trying their hand at their first projects, to experienced hobbyists and even professionals. The Brother 1034DX is a newer, updated version of the company's best-selling Brother 1034D serger, and while there aren't many differences between the two models, it offers a slightly better lighting area Some of the specialties you expect to find when buying the Brother 1034DX Serger machine are the easy process of threading and functioning the differential feed. This is also a sewing machine that comes with a wide range of accessories and multiple stitch options, so you can easily customize them to your specific projects. Some of the key features of the Brother 1034DX serger are: Versatile Stitch Options Differential Free arm for sewing covers and cuffs Illuminated workspace Built-in storage 2-point wire voltage control device Overall performance The Brother 1034DX has a hefty punch for sewing machine of its size. If you're new to the world of sewing machines, you may wonder what a serger is. This is a specific type of sewing machine that is designed for making seams and other types of similar stitches. For this reason they are able to use multiple lines of thread at the same time. Also known as overlocking machines, sergers are not replacements for regular sewing machines because they cannot be used for things like zippers, buttonholes, topstitches and the like. The Brother 1034DX overlock is a 3/4 thread serger, which translates into having the ability to use three or four threads for making seams. The colour-coded thread system is very intuitive and user-friendly. In addition, the machine has 22 built-in stitching functions, which is quite a lot for a serger. This is a specialized machine that focuses on a wide range of applications. Ease of use In general, the Brother 1034DX is very intuitive, and the comprehensive user manual has all the information to get you started right away, even if you haven't used a machine of this type before. No matter what level you are, the machine is very easy to use, and although it has many features that can look a little overwhelming at the beginning, you will find that they are not complicated once you get into the knee of things. In addition, the color-coded threading system is very easy to track and since the lower looper threading system provides excellent support, you focus on serging and the wires are sure to stay in position. Sewing speed The styling speed of the Brother 1034DX is up to 1300 stitches per minute, and once you've mastered it, you'll find it's very easy to get great results at top speeds. The speed is adjustable so you can find the right one for the type of fabric and stiches you do. You can easily adjust the speeds via an intuitive dial, and the process of doing so will not waste your time. Built-in stitches, stitch length and width The Brother 1034DX comes with 22 built-in stitches, which may not sound like much when you compare it to the more than 100 stitches that are available even within budget, regular sewing machines. However, this is very much for a serger, and enough to create all the seams you need. You 4 wire overlock, 3 wire overlock as well as ribbon lock, rolled hem and narrow hem stitches with the Brother 1034DX serger. Optional press feet are also available at Brother, and with them you perform extra stitches such as flat lock, blind hemming and pin tucks. The overlock seam width is adjustable between 5.0 – 7.0 mm. The stitch length is 2.0 – 4.0 mm, while the stitch width is 5.0 – 7.0 mm. Switching between different widths is very and you change them based on the type of fabric you use for a particular project. Free arm Despite the fact that this machine is quite small, can still use it for larger projects thanks to the free arm. The Brother 1034DX machine comes with a removable free arm or a flatbed convertible, which makes it easier to sew tube pieces. All you have to do to use the extension is click it in place, position the fabric, and start sewing as usual. The free arm component also allows you to move the machine easily. Lighting Brother has thought of just about everything for the Brother 1034DX, and this includes a light bulb, so you can easily see the project you're working on, even in low light. The lamp is replaceable, with spare parts readily available from Brother. Additional accessories The machine comes with several additional accessories, including two snap-on feet, a soft cover for storage and transport, a foot controller, multiple needles, four wire nets, four wire coil caps, a manual and an instructionAL DVD to get you started right away. A cleaning brush is also included, so you can keep your machine in top condition. You also buy additional accessories for the machine from Brother or third parties. For example, a hard cover is a good choice for those who want to be able to transport the serger safely. Dimensions and weight The dimensions and weight of a serger are particularly important factors to consider when shopping for such a machine, as they will determine whether the machine is easy to move from one place to another and whether it fits properly in your designated sewing room. The dimensions of the Brother 1034DX are 11.73 x 10.98 x 13.19 and the machine weighs 13.45 pounds., making it quite lightweight and portable. Price The Brother 1034DX currently sells at just under \$240, making it not the cheapest serger out there, but it's still a great price considering the multitude of features and features this machine offers. It's a great choice for those who are just getting started, while also offering advanced users good value for money. Key features As you've seen above, the Brother 1034DX comes with a wide range of features and functionalities that suit the needs of all kinds of crafters. Here are some of the most important of them: Two needles and 3/4 thread to a wide range of easy color-coded threading projects for ease of use, especially useful for beginners. While some users mentioned that the system can be a little frustrating the first few times, once you get the hang of it, you'll discover that it's quite intuitive. Fast stitching up to 1300 stitches per minute allows you to perform all your tasks quickly without sacrificing quality. Differential dust feed for improved stitch quality - this feature is very useful when working with or knitted fabrics, because this allows you to avoid bumpy or wavy look. Adjustable stitch width that you can easily change according to your Free arm for making sleeves and sewing cuffs Two-point wire tension control device that allows you to adjust the voltage for each of the needles for precise sewing buttons The press foot pressure adjustment button for extra easy operation The retractable mesms prevent you from accidentally cutting your fabric when working closely on rolled-up hems. You also easily tun out the knife completely for projects where you don't need to trim the edge. Lamp lamp for a brightly lit workspace. The lamp is also replaceable and the parts are readily available for extra peace of mind. The machine uses standard sewing machine needles so you can easily replace them at low cost. The built-in storage space you put all your accessories and wires on the front panel, where they are very easily accessible. The instructionAL DVD and bilingual manual help you get started right away. Way.
