

Position title: Business Analyst

Do you want to actively contribute to the clean energy transition? Do you want to be a part of an international team working to innovate sustainable home renovation? Do you thrive facing new challenges and finding solutions to complex problems? Are you a skilled communicator able to convey the essence of a multifaceted issue to a broad audience? Is work-life balance and flexible modern work environment appealing to you? If you answered “yes” to most of the questions, this position is for you.

Job Description:

The Analyst will be working in a dynamic team focused on innovations in eco-sustainable home renovation in Europe. S/he will be working on business model design, underwriting, and financing structuring for home renovation programs. Additionally, s/he will be directly involved in design, set up, and management of eco-sustainable renovation programs delivering high social, environmental and economic impacts. Working together with an interdisciplinary team of professionals, the Analyst will support public authority clients on a range of issues, ranging from financing schemes, to legal set up, to selection of eligible building improvements. This is an opportunity to be at the forefront of the changes in the built environment, construction, and financing sectors.

This role will have a dual focus and thus, the Analyst will be reporting to the Head of GNE Solutions. At GNE Solutions, the Analyst will be responsible for fulfilling the requirements of the European projects, developing compelling grant proposals and working closely on home renovation programs. Additionally, the Analyst will develop financial models to evaluate the feasibility of new programs and agreements with new partners. The Analyst is expected to work well independently, collecting information, conducting research and creating documents for the various stages of the European projects and programs. Collaboration and coordination with other European organizations is essential.

Below is a breakdown of the activities by topic:

- Management of European multi-stakeholder projects (30%)
- Proposal development (20%)
- Business development and program design (20%)
- Marketing & communications (10%)
- Coordination and advocacy at the European and Spanish levels (10%)
- Reporting and impact tracking (10%)

Experience and background:

- Familiarity with energy efficiency, renewable energy in the built environment
- Understanding of sustainable financing, retail financing, financing clean energy projects
- Experience working with public authorities (cities, regions, energy agencies, etc.)
- General knowledge of building renovation financing schemes in Europe
- Familiarity with European grant funding schemes is preferred
- Understanding of the renovation landscape from a policy perspective

- A strong network in clean energy, urban regeneration, home renovation.

Professional strengths:

- Excellent written and verbal communication skills and ability to adapt communication styles depending on the audience
- Excellent command of the English language; French, Dutch or Spanish is a plus
- Analytical and detail-oriented
- Efficient in time management (planning and execution)
- Team player with demonstrated work ethics
- Willingness and ability to travel on a project basis
- Willingness and ability to address urgent business requirements outside of office hours for core project activities

Location: We are a modern and flexible company, with team members located in 5 countries. While the HQ is located in Barcelona, we make an effort to recruit talent from all other European countries.

About the Company and Team: GNE Finance is a high impact investment company providing financing for the built environment. GNE works with cities and regions to design the programs accessible to all citizens, including vulnerable groups. We deliver innovative solutions that maximize social and environmental impact while delivering sustainable returns to capital providers. We offer homeowners support and affordable tailored financing for energy efficiency, renewable energy, water conservation, safety and accessibility improvements.

GNE Finance is a fast-growing company and we offer ample opportunities for growth for promising team members.
