So it's quite powerful way to loop a video. And I can also use Coub to create the short videos, just like, one minute video clips, 2, 3, 5 minute, even 15 minutes or 20 minutes videos. That's the other feature. Nanite – A great app for combining any photo with a text and that photo with a map. So you can create some pretty nice looking photos. I can make some map images and some text together and that look awesome. You can add some video effects, too. Nanite is a great application. Moovly – A very powerful tool. So this is an app to create animated GIFs. So I can create a very nice animation, very nice looking animation, and I can use the images or the images in the Picasa app, and I can use the text I want to write. Now the last one here is the one to create the videos. And this is the app to create the videos from a series of images and it's called Canva Video Maker. You can add text, too. So I've already created some videos, and you can just re-use them. But I've also created a very nice looking video and I want to save this as a video, and I also want to add the text. And so this is Canva. I have to leave it there. I hope this video helps. Please be so nice to send me your comments. I love to answer all your questions, and if you have anything else to ask me, please do so in the comments, because I can't possibly answer them all myself. So please do write your comments and questions, and I will answer them as quickly as possible. Related About Author You are a customer service and technology enthusiast. I am also interested in politics, spirituality, and business. I am a customer service and technology enthusiast. I am also interested in politics, spirituality, and business. I have been working in the Customer Service and Technology sector since 2001. I am experienced and passionate in improving systems and people.
