For those who don't even unlock the mining class: The miner guild is in Ul'dah. Make sure you know all about getting EXP most efficiently. We have a gathering general equalisation guide for The key points are: Choosing the right levequests (those with ratings can potentially give a mad EXP), keeping key pieces of equipment up to date (to obtain EXP on the node), and make the most of each node (using skills correctly). Our Gathering Gear Guide is something you should keep open when leveling up. When it comes to mining class Quest items, it is perfect for a farm for them as you come across the next quest. (For example, a Wyvern Obsidian farm when you're level 26-29). Briefly, we will put all the items needed here (they are listed again in more detail on each section). Our Mining Node/Material Places Guide will help you with this and in finding specific items.
