Grammar!

to + verb = infinitive

We use the to-infinitive after certain verbs, particularly verbs of thinking and feeling:

choose
decide
expect
forget

hate
hope
intend
learn

like
love
mean
plan

prefer
remember
want

- I like **to swim** in the morning.
- You prefer **to sit** in the park and do homework.

Let's
Read!

Musical Instruments

Music is produced with objects called musical instruments. Musical instruments can be as simple as a bell or drum, or they can be complex as an oboe or piano. Musical instruments come in many shapes and sizes also. Some are very large and some can fit into your pocket. Musical instruments are a part of almost every culture around the world and date back almost to the first humans on earth. Geologists have found clay drums and horns made from shells that are thousands of years old and belonged to the earliest humans.

Musical Instruments

Music of
ancient
Egypt

We use music in many different ways and for various reasons. Musical instruments have a remarkable ability to make humans feel emotion. Many religions around the world use musical instruments during their services. Some cultures believe musical instruments have magical powers. Drums have been used to make evil spirits go away. They have been used to announce the arrival of kings and in battle with armies. Of course, musical instruments are used for entertainment and pleasure worldwide.

Musical Instruments

Humans have been very creative when making musical instruments throughout history. The "bullroarer" was made from an animal bone with a hole in one end. They would attach a string and swing it in a circle above their heads to make sounds. Whistles and horns have been made from bird bones, seashells, and animal finger and toe bones. Animal teeth would be put inside of gourds or nutshells and used as rattles. The first string instruments probably came from bows used for hunting originally.

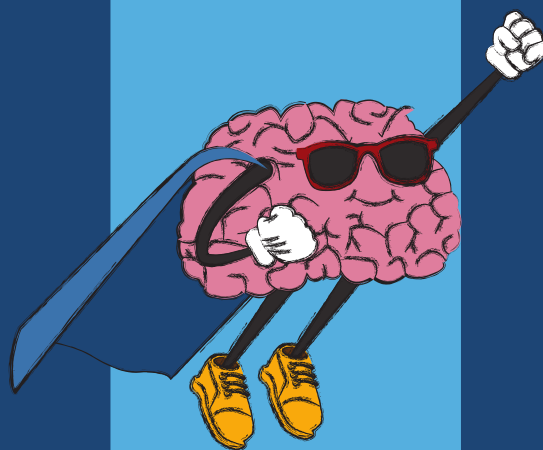

Modern
