## India's AI Future Takes Center Stage at 2026 Summit Pre-Event in Delhi

AI4India, with Intel and IHFC, is hosting the official pre-event for the India-AI Impact Summit 2026 at IIT Delhi. The event aims to build inclusive AI solutions for India's diverse challenges through keynote sessions and panel discussions. It will feature over 30 speakers, launch a major report on AI and employability, and host an expo for 25 emerging AI startups. The initiative underscores a collaborative push to drive responsible and scalable AI innovation aligned with national development goals.

### India must realign education, skilling, hiring for AI era: AI4India report

The recent study outlined a set of imperatives for policymakers, educational institutions, industry, and EdTech platforms, warning that fragmented or delayed responses could leave millions of graduates ill-prepared for the AI-era job market.

AJAY KUMAR

The report, *Future of Employability in the Age of AI: India's Playbook for Students, Institutions, and Industry*, draws on more than 85 interviews conducted between November and December 2025 with leaders from industry, academia, government, EdTech, staffing firms, and student communities.

The urgency of this research stems from three intersecting crises that, if left unaddressed in 2026, carry the risk of a fundamental decoupling of Indian higher education from the global economy with a direct impact on the employability of an entire generation of fresh graduates, it asserted.

At the policy level, the report urged the government to declare AI literacy a national baseline across disciplines, rather than confining it to technical education.

## India needs stronger data frameworks, investor push to scale AI: Co-founder of AI4India

By Kaushal Verma | Updated: Jan 23, 2026 16:06 IST

Add as a preferred source on Google

New Delhi [India], January 23 (ANI): India has a vast reservoir of consumer and public data but lacks the frameworks needed to make it accessible and usable for artificial intelligence developers, creating a major untapped opportunity for the country's AI ecosystem, said Alok Agrawal, co-founder of AI4India.

Ashutosh Dutt Sharma, CEO, IHFC–IIT Delhi, called for collaboration between research institutions, industry, and public systems. “AI must move beyond experimentation to deliver measurable societal outcomes at scale,” he said, underlining the urgency of translating AI innovation into real-world impact.

A central concern was preparing India’s workforce for an AI-driven future. Shashi Shekhar Vempati, Co-Founder, AI4India, highlighted youth employability. “There is a lot of anxiety globally about AI taking away jobs. What we need to address is the anxiety our youth feels about employability. Preparing students and employers for an AI-driven future is not optional anymore,” he said.

# AI4India flags data access gap in India

The Business Guardian | January 24, 2026

India has a vast reservoir of consumer and public data but lacks the frameworks needed to make it accessible and usable for artificial intelligence developers, creating a major untapped opportunity for the country's AI ecosystem, said Alok Agrawal, co-founder of AI4India.

## Business News | India Needs Stronger Data Frameworks, Investor Push to Scale AI: Co-founder of AI4India

*Get latest articles and stories on Business at LatestLY. Speaking to ANI on the sidelines of a pre-summit conclave ahead of the AI India Impact Summit 2026, Agrawal said India must focus on enriching and structuring local data to build AI models relevant to its diverse population. "One very strong thing coming out is that there is a lot of data which is available... but we don't have the right framework to use it or make it available to model developers," Agrawal said.*

New Delhi [India], January 24 (ANI): India must urgently realign its education, skilling, and hiring systems to keep pace with the rapid transformation of work driven by artificial intelligence, according to a new report released by AI4India.

The recent study outlined a set of imperatives for policymakers, educational institutions, industry, and EdTech platforms, warning that fragmented or delayed responses could leave millions of graduates ill-prepared for the AI-era job market.
