But now, when I open it, it crashes on startup. I don't really understand what goes wrong here. It worked a few days before. A driver update maybe? Maybe I didn't install correctly? I uninstalled it several times and reinstalled. I tried to open it, using the trial version. Which I could. Any help would be appreciated! Adobe Photo Deluxe Home Edition 4.0 help Adobe PhotoDeluxe Home Edition 5.0 (Win 32) Crashed Help me please.... I have downloaded the software, and when I tried to install it by going to the control panel and hitting the add/remove programs item, I did not get an option to install it. When I go to the add/remove programs, there is no mention of it. I uninstalled it from the control panel a couple of times, but it still shows up. The thing is, there are a couple of programs that I would like to have access to but they're not in my add/remove programs. I would appreciate any advice on how to get it removed from my system or how to install it correctly so that it works. I have tried to uninstall and reinstall it. I also tried the trial version. I'm using Windows 7. Any idea? Adobe Photodeluxe I have found this software to be extremely buggy and crashing all the time. I don't think I can use it at all. I am downloading another (Photoshop Elements) and I am going to have to uninstall this one. If anyone has used this program, I would appreciate any help you may

have regarding this issue. Unable to install Photoshop Elements Home version 8. Unable to install Photoshop Elements Home version 8 Can't install Adobe Photoshop Elements on Vista Can't install Adobe Photoshop Elements Revert to original state Please please help me with this error. I have tried every software update I can find. I have tried to install a new program and a software update. I have even tried the newer/older version. I really need this program to work. I have all my documents on this program. Please help me. Re: Unable to install Adobe Photoshop Elements Home version 520fdb1ae7
