A Message From The Feelings Practitioner Team

The Feelings Practitioner trainer team - Michaela Arava Kaiser, Katharina Kaifler, Dagmar Thuernagel and Samoto Michael Hallinger – has recently honoured Kathrin Feindor for successfully completing the Feelings Practitioner curriculum (ten Possibility Labs & six Feelings Practitioner Labs). Next culture healers keep participating, contributing to the research, spreading the inspiration and nourishing the archetypal field of healing – another reason to celebrate!

Feelings Practitioners are playing with new perspectives regarding the interplay between physical and emotional body. The team is ongoingly developing techniques and skills, providing contents for professional application.

Now, again, the Feelings Practitioner trainer team is following the necessity of the field: each of the **four Labs in 2022** will be extended to **five days** with more space for research, deepening and practice, with **one Lab (4-8 May 2022) being in English** and **three (February, June, November 2022) in German** language.

For further information contact info@michaelakaiser.de.

5-day Expand The Box Men in Poland

Report from Marcin Szot: *"On Sunday I came out of the first ever (as I have heard) 5 days Expand the Box only for Men. Spaceheld by Michael Portner. It was pure Magic! And Love! I am still under big Wow! How it worked and how the men were jumping into their feelings, responsibility, learning and practicing new worldview and skills. I had 18 powerful examples that prove I cannot go on with the story that men are not doing their work."*

Startling Tales About Radical Responsibility

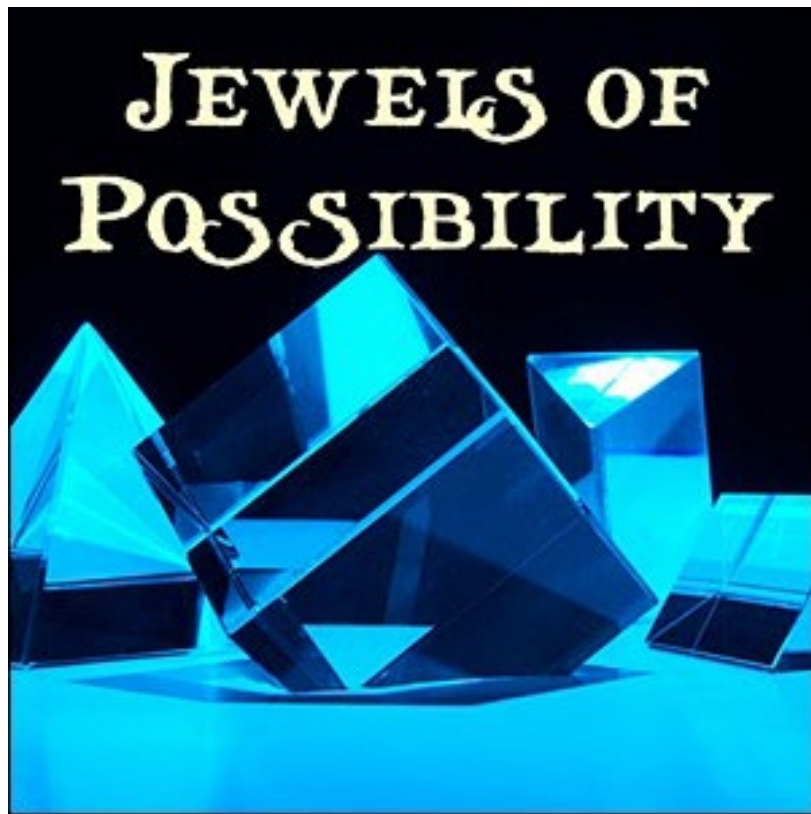

STARRs are not trying to present you with polished methods. There aren't any. We are sharing our discoveries with you along our experiential journey.

Each video we share is a window into a precious moment of our lives. So many precious moments already passed before we figured out that we could share our [High Level Fun](#) with you. Then you can try these things too.
