Napoleon hill think and grow rich 13 principles

63 Promotions Can a book written more than 80 years ago (1937, to be exact) still relevant today? The answer to this question is a definite Yes! At least when it comes to Napoleon Hill is widely cited the volume of Think and Get Rich. This evergreen classic in personal success and leadership is one of the best-selling book management of all time. Inspired by the conversation that the author had with business tycoon and philanthropist Andrew Carnegie, Think and Get Rich was marketed as a book containing money-making secrets that could change your life. However, it's certainly not a scammy to get rich fast books. Instead, a thin volume acts as a plan for personal and professional success, complete with detailed strategies, techniques and examples. The power of thoughts focuses on the premise that the thought of things, the book extols you to make positive and successful thoughts permeate your mind, so that they can affect both your conscious and subconscious. By controlling and controlling your dominant thoughts, you better steer your path to greater success - and wealth - in all aspects of your life. To accumulate any form of success in great abundance, you need to magnetize your mind with a strong desire, create a certain plan and believe that you are able to do it. This is where Napoleon Hill's 13 principles come in. #1 desire your starting point for any achievement is desire. To turn any desire into gold, Hill offers six practical steps: Fix in your mind the exact amount of money you want. Determine what exactly you are going to give in exchange for the money you wish for. Set a certain date when you are going to possess the money you want. Create a specific plan to carry your desire, and start right away, whether you are ready or not, to put that plan into action. Write a clear, concise statement about the amount of money you are going to purchase, name the term of its purchase, write down what you are going to give in exchange for money, and clearly describe the plan with which you are going to accumulate it. Read your written statement out loud, twice a day, once before retiring at night, and once after the occurrence in the morning. As you read - to see and feel and believe yourself already in possession of money. #2 Faith is an eternal elixir that gives life, power and action to the impulse of thought! - Napoleon Hill is considered the most powerful of the basic positive emotions along with love and sex, faith can be strengthened through the principle of autosuggestion. It is a state of mind that can be built through positive thoughts mixed with strong emotions. To clear your mind of fear, doubt and disbelief, Hill offered the following affirmations of faith to build your self-confidence (short for): I know I have the ability to reach an object specific goal goal Life I demand from myself persistent, continuous action towards its achievement; I realize the dominant thoughts of my mind eventually reproduce themselves in external, physical action, and gradually transform into physical reality; so I will concentrate my thoughts for 30 minutes daily on the thinking of the person I intend to become and the creation of a clear mental picture; I know, on the principle of autosuggestion, that any desire that I persistently keep in my head will eventually seek expression through some physical means; I devote 10 minutes every day to self-confidence; I clearly recorded a description of my specific main purpose in life; and I will never stop trying until I have enough self-confidence to achieve it; I will not participate in any transaction that does not benefit everyone it affects. I will succeed by attracting the forces I want to use and the cooperation of others. I will encourage others to serve me because of my willingness to serve others; I will destroy hatred, envy, jealousy, selfishness and cynicism by developing love for all humanity; I will make others believe in me because I will believe in them and in myself; I will sign my name with this formula, shine a light on her memory and repeat it aloud once a day, with full faith that it will gradually influence my thoughts and actions to make me an independent and successful person. #3 Autosuggestion Autosuggestion travels to the power of self-denial to reach the subconscious and influence it with positive thoughts. In modern language, it is known as the power of visualization - a method used by coaches around the world to trick your subconscious into believing in opportunity through repeated instructions. Here's how Hill suggests it can be done: Find the perfect environment: Look for a quiet place where you won't be disturbed by Close Your Eyes and Repeat Aloud: State's Written Statement on How Much Money You Want, Term for It, and Description of Services or Products You're Going to Give for Money. Repeat: Make this morning and night until you can see in your imagination the money you want to save up. Author copy: Put a written copy of your statement where you can see it at night and in the morning, and read it shortly before retirement and after the occurrence until it has been remembered. #4 knowledge is only a potential force. It becomes power only when, and if, it is organized into certain action plans and directed to a certain end - Napoleon Hill Knowledge in a specialized and valuable area where power and wealth can be found. According to Hill, knowledge will not raise money unless it is organized and intelligently directed through practical action plans until a certain end of accumulation To deepen your specialized knowledge, you must spend your time and money on both formal and informal education. You can do this by selecting highly specialized courses on subjects you want to focus on. #5 Imagination touted as a master mind, imagination can be classified into two different forms: Synthetic Imagination: the ability to organize old concepts, ideas, or plans into new combinations. It takes advantage of your experience, education and observation, and is mainly used by inventors. Creative Imagination: This is where the ultimate human mind communicates directly with Infinite Intelligence. It is presented through guesses or inspiration received by the subconscious. Like any organ or muscle, your imagination can only be more alert with use. To reinforce your ideas of generating mind machines, you have to have a plan. #6 planning to turn your abstract ideas specific, you need an action plan. There are a few steps you can do this. a) Form a Master Mind Group Ally on your own with a group of like-minded people to create and execute your plan (or plans). Before you do this, decide what benefits and benefits you can offer to your group.5 million people. Organize a meeting with these members at least twice a week or more often, if necessary, and maintain perfect harmony with each member of the team. b) Build your leadership potential here, Hill describes some of the leadership attributes that we should all strive for: The unwavering courage of self-control Of the Acute Sense of Justice Definition of Decision (Later) Certainty plans to do more than pay for a pleasant personality - leaders may not be sloppy or sloppy with sympathy and understanding of skill in detail. We also need to avoid management failures: Failure to organize details Reluctance to provide a modest service Waiting to pay for what we know, not what we do with what we know Fear of competition from followers Lack of Imagination Selfishness Intemperance (e.g., loss of control through alcohol or drug use or other vices) Disloyalty Accent titles c) Apply to the right position In this hefty section We learn about how we should sell our personal services as an individual to the organization, and provide the desired job. Most of it includes finding the right opportunities through multiple channels (job advertisements, employment agencies, application letters, personal networks) and creating the perfect brief (i.e. resume and cover letter). You should also consider the following steps: Decide the exact work you want to choose the company or individual you want To study your potential employer's policies, staff and promotion chances to focus on what you can give; Forget about the work Of Ordering Order Experienced writer to put your brief in paper present for a proper person with the power of d) Use cop formula To accept the following: The quality of service: the performance of every detail, due to your position, most effectively possible in order to increase efficiency in the mind of the number of services: the habit of providing all the services that you are able to, at all times, in order to increase the number of services provided as greater skill develops Spirit of Service: a habit of pleasant, harmonious behavior that will encourage colleagues and partners to cooperate (e) Conduct self-assessment to avoid the main causes of failure, useful to carry out personal inventory. In the book, we got a detailed list of 28 questions that you can ask yourself (you can find a copy here.) F) Look for opportunities Finally, your plan should include taking stock of opportunities to gain wealth. This can be in almost any industry where market demand outpaces supply. #7 Opinion solution are the cheapest goods on earth. - Napoleon Hill Referring to procrastination as the greatest enemy of success, the book extols us to make decisions quickly, and change decisions slowly. The key here is to reach your own decisions, and ignore the opinions of everyone else - newspapers, gossip neighbors, family members, friends and others. Decent decisions often require enormous courage. However, they are always worth acting on. #8 perseverance is the cornerstone of any form of worthy effort. This allows you to overcome your failures, and endure the journey along the long path to success. There are four-steps cited in the book: A Certain Purpose: Relying on a burning desire to fulfill. A specific plan: Expressed by continuous action. Independent Mind: Closed against all negative and discouraging influences, including negative suggestions from relatives, friends and acquaintances. Friendly Alliance: Formation of the Master of Mind with one or more people who will encourage you to follow through with your plan and purpose. #9 The Power of the Main Mind, defined as coordinating knowledge and effort, in a spirit of harmony, between two or more people, to achieve a certain goal, the formation of the Master Mind allows you to multiply your brain power. For example, Mr. Andrew Carnegie's Master Mind group consisted of 50 employees whom he surrounded to produce and market steel. By identifying and recruiting people into your host mind group, you can increase your power - here it refers to the organized forces needed to allow you as an individual to transmute desire into its monetary equivalent. #10 The mystery of sex transmutation when driven by this desire (ie sex), people develop acuity of sharpness. courage, willpower, perseverance and creativity unknown to them at other times. - Napoleon Hill This chapter invariably confuses readers. What it seeks to communicate is: Can you transform your energy, emotional intensity and creativity for sexual expression into a positive force that will bring wealth? To do this, consider this two-step approach to the transmutation of your sexual energy in a positive way: Mental stimulation: Stimulate your mind so that it functions on a higher-than-average plane, using the same intensity and desire for sexual contact. Perfect Picture Form: Focus on the known factors of your invention and create the perfect picture of unknown factors in your mind. Keep this picture steady until it has been taken over by the subconscious and then wait for the response to the flash to your mind. Emotions of sex are at the top of the list of human emotions, as far as intensity and driving force are concerned... The result of sex-transmutation is an increase in thought to such an altitude that the creative imagination becomes very receptive to ideas. - Napoleon Hill #11 The Subconscious, To activate and feed your subconscious mind with positive thoughts, you should use autosuggestion to give instructions that focuses on 7 positive emotions: Emotions of Desire Emotions Emotions Emotions Emotions Emotions Enthusiasm Emotions Emotions of Hope Emotions At the same time, you should avoid any thoughts associated with 7 negative emotions: Emotions of Fear Emotions Jealous Emotions Emotions Emotions It is suggested here that if you pray for a thing, but there is fear as you pray that you cannot get it, your prayer will be in vain! #12 brain equating the brain to broadcasting and getting the station to think, Hill described how the brain, mind and subconscious work. Let me extract some of his excerpts below: Creative imagination is getting a brain set that gets thoughts released by the brains of others... When stimulated or sped up to a high vibration rate, the mind becomes more receptive to the thought that reaches it through external sources. The subconscious is the point of sending the brain through which the vibrations of thought are broadcast. Creative imagination is a receiving set through which the energies of thoughts are picked up. ... principle of autosuggestion, which is the means by which you can put into operation your broadcasting station. #13 Sixth Sense Some call it your intuition or hunchback. Others may call it your genius or muse. Regardless (or anyone) The inspiration may be, Hill suggests, that your sixth sense can be nurtured by cultivating in your creative imagination a team of Invisible Advisors. In his case, they included people such as John Emerson, Thomas Payne, Thomas Edison, Charles Darwin, Abraham Lincoln, Napoleon Bonaparte, Henry Ford, and Andrew Carnegie. By forming an imaginary cabinet, you can click on the ideas, thoughts and knowledge of these outstanding luminaries in your mind! Scattering negative influences towards the end of the book, Hill detailed six basic fears and how they can derail your efforts: Fear of Fear of Bad Health Fear of Loss of Love Fear of Old Age Fear of Death, To Overcome These and All Other Negative Thoughts, It Offers the following Practical Steps: Recognize That You Have WillPower That Can Be Introduced to Permanent Use Recognize that you are susceptible to all six major fears Setting habits to counteract these fears Recognize that negative influences work through the subconscious Keep your mind closed against all people who oppress or discourage you in any way to clean your breast medicine, throw away all pill bottles, and stop pandering to your hypochondria to intentionally seek out the company of people who influence you to think and act for yourself Don't expect trouble because they tend not to disappoint Conclusion Think and Get Rich is one of the iconic books in self-help literature. Although it was written more than 80 years ago, its principles are still relevant in the digital and social age. While some of Napoleon Hill's philosophies and principles are a bit of a stretch (such as Sex Transmutation and The Sixth Sense), I have found that his lessons are still applicable today. Almost all gurus in the field of personal development have borrowed his ideas - from Tony Robbins, Brendon Burchard to Norman Vincent Pele and Bob Proctor. Do you think that 13 principles of think and get rich are applicable to you? Have you applied them to your own goals in life? Anyone can desire wealth, and most people, but few know that a certain plan, as well as a burning desire for wealth, are the only reliable means of accumulating wealth. - Napoleon Hill 63 Stocks Related
