

What is it?

A complete laboratory trial test service to process all types of organic waste which includes:

- Bioenergy potential measurement in your waste through continuous dry anaerobic digestion process
- Fast composting test after digestion
- Fertilizer composition analysis
- Complementary trial test analysis report

Lab Equipment Parameters

Digester type	Dry Anaerobic
Capacity	1 - 10 kg/day
Mixing method	Mechanical horizontal agitation with automatic control
Digestion Temperature	36.2°C ~ 36.8°C
Material	Stainless Steel 304
Dimension	1.5 x 0.9 x 2.3 (m)

FLEXIBLE DESIGN

EASY TO RUN

COMPLETE CONTROL

UNIQUE PERFORMANCE
