Crystal River, Florida on January 1, 2020 Product: Cygolite Hotshot Micro USB Rechargeable Taillight Property: Tech Knowledge Month: On average I used light for 30 days with a hitch of rain or shine. Long battery life. Easy to attach. Ron M. from Bulverde, Texas on December 29, 2019 Product: Cygolite Hotshot SL 50 Rechargeable Taillight Property: More than a year of Tech Knowledge: High Super Bright - so vividly it attracts complaints in group rides - they make 150, can't imagine wanting a brighter. Very effective - there has never been a single apartment run. It's easy to charge a USB. Good shiny patterns and variable speed. Good support from Cygo with a good parts page. The seat clip works, but can become creative with clips - I have 6 cropped different, rear mount racks, and most clipped up saddle tool bags. Cons could say bright again here - so vividly it attracts complaints in group rides - they make 150, can't imagine wanting Brighter. Otherwise, no complaints what it would be. Other thoughts are really good buying here in the long run. Philip W. Santa Claus, IN May 29, 2019 Product: Cygolite Hotshot 100 Rechargeable Taillight Property: Technology Knowledge Month: Somewhat High It's a Great Light for Day and Night Nights I use it in flashing mode for daytime safety. I have both 100 and 150s and I like the 100 better because it provides enough brightness to be easily seen in daylight and its charge lasts much longer than 150. Cons Not as bright as the 150 model.
