Escape From Tarkov Time Phase

PREPARE TO ESCAPE OFFILINE RAID TEST MODE			
For the purpose of enhancing testing capabilities, the Beta version of the game will include a special offline mode that allows players to enter the raid completely alone (with or without scavs). This can be used for exploration and testing of the location, weapon adjustment, character testing, and other desired activities if the game servers are busy or			
currently unavailable. Over time, we intend to add a variety of different activities available in the offline mode to include as many features as possible for testing purposes.			
Attention! Your progress is not being saved due to being in offline mode! Also, at this current stage in testing offline mode will include different items for testing purposes.			4
