How to jailbreak iphone 5s with computer

Earlier this week we published a tutorial showing how jailbreak iOS 13.5 on macOS, but we realize that not all iPhone users are Mac users. In today's tutorial, I would like to show you how jailbreak iOS 13.5 using a Windows computer. This tutorial also shows you how to fix the annoying error message AltServer could not be found. Watch the full video for details. Although the jailbreak process of your iPhone is similar on Windows machines, there are some obvious key differences. The biggest difference is that iTunes is no longer a thing on macOS, but it is still needed for iPhone users running Windows. Follow our easy-to-use tutorial for breakdown. How to jailbreak iOS 13.5 on a Windows computer using UncOver Step 1: Visit altstore.io and download the AltStore for Windows beta. Step 2: Extract the contents of the AltStore folder and start the setup utility to install AltServer. Video Walkthrough: How to jailbreak iOS 13.5 Subscribe to 9to5mac on YouTube for more Step 3 videos: Click the Start menu and start AltServer. Step 4: If you haven't already downloaded iTunes and iCloud, AltServer will require you to download both. If you already have versions provided by Apple of both iTunes and iCloud, you can skip this step and go straight to step 5. The great thing about AltServer is that it will provide you with direct download links to both iTunes and iCloud. Jailbreaking won't work with the Windows Store version, so be sure to follow the download link to get both iTunes and iCloud directly from Apple. Windows will prompt you to restart your PC with each installation, but I saved the restart until iCloud was downloaded and installed. After the success of installing iTunes, you will need to start AltServer again to request the download and installation of iCloud. Installing iTunes from Apple If you see the pop-up iCloud login request you can ignore it. You don't need to sign in to iCloud on your Windows computer to use this jailbreak. ME Installing iCloud from Apple Step 5: Connect your iOS device running iOS 13.5 to your PC with a Lightning to USB cable. On your iOS device, tap the Trust button that appears and enter the passcode. Make sure your device is recognized in iTunes. Step 6: Click the AltSever icon in the system bar in the lower right corner and select Install AltStore → <name of your= ios= device=>. Step 7: At the prompt that appears, enter your Apple ID and password to authenticate with Apple, and then click Install. This authentication is what will allow you to load the AltStore app sideways on your iOS device and is needed. Step 8: A few seconds you should see the AltStore app appear on your iOS device. Step 9: On your iOS device, go to → General → Device Management settings → apple id → and tap the Trust button for your Apple ID. Step 10: Return to the Home screen and start AltStore. Step 11: Tap </name> </name> in the lower right corner and tap Sign in with Apple ID. Again, enter your Apple ID and password to authenticate with Apple servers to allow for additional side load, this time for the UncOver utility. If you receive an error message indicating that AltServer was not found, disconnect the iPhone from your PC and reconnect your iPhone. Make sure iTunes recognizes your iPhone, then try to log in again. Step 12: Close AltStore and open Safari and navigate to UncOver.dev. Step 13: Tap the Open button in altstore, and then tap the Open button. In the AltStore, you'll see a upload indicator at the top to represent the download status of the UncOver jailbreak utility. Once downloaded, the utility will appear in the list of active apps in AltStore. Step 14: Tap the 7 Days button next to the UncOver utility, and this will install UncOver on the home screen of your iOS device. Step 15: Start UncOver and tap Jailbreak. Tap the OK button to restart the device. In the jailbreak process Step 16: Start UncOver again and tap Jailbreak. Tap the OK button to restart again. Step 17: Once rebooted, Cydia will appear on the Home screen, which will allow you to install your favorite jailbreak changes and jailbreak themes. Cydia icon! On reboot, you'll need to jailbreak UncOver again to re-establish jailbreak. This should only take a few seconds. Take by 9to5Mac I'm curious: do you jailbreak your iPhone? Why or why not? I personally no longer like jailbreak, but such a version for a current version of iOS is very rare these days and it is worth pointing out. Cydia installed on iPhone SE with 13.5 I liked breaking to customize my device with themes and changes to jailbreak. In fact, many of the features we see today on iOS were first available as changes years ago. I would say that jailbreak has contributed in a not-so-insignificant way to iOS innovation over the years. What do you think? FTC: We use income-earning car affiliate links. More. Check out 9to5Mac on YouTube for more Apple news: This guide provides instructions on how to jailbreak iPhone 4, iPhone 4s, iPhone 5, iPhone 5c and iPhone 5s on iOS 7 to iOS 7.0.6 (also works on iOS 7.1 beta 1 and beta 2) using EvasiOn for Windows.Before you start Try making sure you have a backup of your iPhone data in case something went wrong. Apple allows you to do this even without using a computer. If you've never done this before, you can check out the following link How to back up an iPhone without Wi-Fi or a computer. In addition, turn off passcode lock on your (you can turn it on after the jailbreak procedure). Also, if you previously upgraded your OTA (Over The Air) device, you should make a full backup, then restore. Now let's start with jailbreaking. Connect your iPhone to your Windows PC and run a manual device data. Create a new folder on your desktop and name it Pwnage. Now download the latest version of EvasiOn. You can find it at the following link. We recommend downloading the iOS 7.0.6 firmware for your iPhone to the Pwnage folder you just created. Evad3rs suggest a full recovery before jailbreaking. Here you can find the firmware for your device. Now, extract the EvasiOn zip file to the same Pwnage folder on your desktop. Start iTunes on your Windows PC. Make sure your iPhone is connected to your PC via USB. Then, select it from the left sidebar or the upper right corner of iTunes. Press the Shift button on the keyboard and as you press it, click the Restore iPhone button on iTunes. A pop-up window appears. Select the iPhone firmware (.ipsw) file from the Pwnage folder that you created on your desktop, and then click Open. Another pop-up window will appear, which will ask you to confirm your action. Just click Repair. When the recovery is complete, right-click the .exe system7. Now, on the context menu, click Run as administrator to start the program. Remove any lock screen passcodes on your iPhone, and then click the Jailbreak button on the EvasiOn app to start the process. The app will retrieve information from the iDevice to generate jailbreak data. Then it will load the data, inject the app evasi0n 1, inject the app evasiOn 2, configure system 1, configure system 2 and finally restart. At this point, you will be asked to unlock your iPhone and tap the new evasiOn 7 app on the SpringBoard. Just tap the app once and it will open and close immediately. Then, Evasion will restart your device again. It will change RootFS and then finish the process. When your iPhone starts, you'll see the Cydia app on your SpringBoard. And that means that you successfully jailbroken your iPhone. If you have any questions or need additional help while performing the steps, feel free to drop a line in the comments section below. And of course, thank you so much to evad3rs for their hard work in creating this jailbreak tool. If they didn't make the effort, we wouldn't be able to execute this jailbreak method. iPhone Jailbreak allows you to get the most impressive and exclusive software and hardware features on your iPhone. iPhone software is jailbreak. Change the default iOS software to install great apps, changes, themes, and so many impressive new features. Use the above jailbreak finder iPhone script to find and download the most suitable jailbreak software solution for iPhone. Last - Zeon is the best solution for iPhone for iOS 14 - iOS 14.1, Jailbreak iOS 14.2 / iOS 14.2.1 & iOS 14.3break Jail versions. Also, you can refer to the following links to Jailbreak your iPhone if you are on these versions of iOS. iOS 13 – iOS 13.6.1 Jailbreak iOS 12.4 – iOS 12.4.9 Jailbreak iOS 12 – iOS 12.3.2 12.3.2 Jailbreak methods of iPhone Jailbreak iPhone software are available as follows. 01. Jailbreak methods based on IPA 02. Methods of installing jailbreak app 03. Jailbreak 04 based on GUI tools. Browser-based Jailbreak 05. Pigsy Online JB (Out of Production) 01. IPA-based jailbreak methods Most of the latest jailbreak methods are IPA-based semi-tethering jailbreaking methods. There are two methods available to install Jailbreak IPA on your iPhone. Select one of the following methods. Cydia Impactor method (a bit hard) Online method (newest and easiest method) In this Jailbreak, you should install a Jailbreak application on your iPhone as an IPA file. You can open this Jailbreak semi application without tethering and tap the Jailbreak button to jailbreak the device in seconds. However, you have to repeat this jailbreak process every time you restart your iPhone. Compatible iPhones : iPhone 11, iPhone 11 pro, iPhone 11 Pro Max, iPhone XS, iPhone XS MAX, iPhone XR, iPhone X, iPhone 8 & 8 Plus, iPhone 7 & 7 Plus, iPhone 6S & 6S Plus, iPhone 6 & 6 Plus, iPhone SE, iPhone 5S i. The Cydia Impactor method (a bit harsh) Cydia Impactor is a multifunctional software, available on Windows, Linux and Mac operating systems to install several IOS IPA apps and files. Use the sideloading technique to upload IPA files to iPhone. This software was developed by Saurik. Usually, every jailbreak tool without tethering or semi-tethered is based on the cut-cidia method. You must use Windows/linux or Mac PC to use this method. Download the Cydia impactor You can download the Cydia impactor from the official website. Note: Cydia impact potential doesn't work properly with a free account. In this case, you can use the cidia cutter alternative to sideload the Jailbreak IPA. The processes are almost the same. Altstore, Sideloadly, Altdeploy are the best alternatives to the Cydia impactor. How to install jailbreak IPA file using Cydia Impactor Step 01 - Download Jailbreak IPA based on iOS version on your Windows or Mac PC. Step 02 - Connect your iPhone to your PC and start Cydia Impactor. Step 03 - Drag and drop the downloaded IPA file on it once it recognizes your iPhone. Step 04 - It will require apple ID username and Apple ID password. Provide them with step 05 - Wait for Cydia Impactor to sign and install the jailbreak IPA file. Step 06 - When the process is complete, select Settings -> General –> Device Manager-> Trust (Installed Developer Profile) Step 07 - You can now launch the jailbreak sideloaded app from the device home screen and complete the iPhone jailbreak process. Note: sideload all jailbreak IPA such as Odyssey, Uncover mentioned in the online jailbreak IPA section available in the App Store section. ii. Online method (latest method) Users can get jailbreak IPA online in several ways. Some third parties app stores provide online jailbreak IPA. You can install all iPA Jailbreaks on your iPhone through the following ways without PC support. IPA jailbreak online from App Store Many third-party App Stores are available to download jailbreak semi IPA without tethering or online tethering. Follow the guide below provided to complete it. Step 01 - First, download one of the following App Stores to your iPhone. Download zJailbreak Download Xabsi Download iExtras Step 02 - Open the downloaded App Store. Step 03 - Then you can download one of the following repository extractors to your iPhone based on the version running on iPhone. Zeon (for iOS 14 + users) Hexxa Plus (for iOS users 13 +) Bregxi (for iOS 13 + users) Hexxa (for iOS 12 + users) Step 04 - Go head with repository installed as follows. Zeon – Open Zeon > extractor Zeon Repo. It will be downloaded to the iPhone settings to > open it for > the installation process. Be sure to provide the device passcode during installation. Then Open Zeon Repo Extractor > Get Repository > Seed Jailbreak tab without tethered. Bregxi - Open the bregxi list > get jailbreak's all source > list. Step 05 - Then copy the jailbreak app repository. which you want to install. Go Hexxa Plus / Hexxa - Open Hexxa Plus or Hexxa > Install Hexxa Plus Extractor / Hexxa Repo > Open Hexxa Plus / Hexxa Repo Extractor app > Get Repository > Seed Jailbreak tab without tethered. Bregxi - Open the bregxi list > get jailbreak's all source > list. Step 06 - You can now install the selected jailbreak app on your device. Step 07 - Then you can complete the iPhone jailbreak process online. Jailbreak Online IPA available on jailbreak app stores provide online jailbreak to follow jailbreak seeds without tethering based on the Cydia Impactor method. Here's jailbreak IPA's exclusive list on jailbreak app stores to complete the iPhone online jailbreak process. Odyssey jailbreakOdyssey Jailbreak is a newly released tool for iOS 13 - iOS 13.7 Jailbreak on A9-A13 devices. It's a semi-tethered jailbreak released by Coolstar. Install Sileo instead of Cydia when the jailbreak process. Download odyssey jailbreak from the App Store. Jailbreak UncOver Jailbreakunc0ver available for Jailbreak from iOS 13 to iOS 13.5 on iPhone A8X-A13. In addition, you can jailbreak from iOS 11 to iOS 12.4.8 versions running iPhone. You can install Cydia or Sileo app managers from Bregxi. Compatible iOS versions : iOS 14.3, iOS 14.2.1, iOS 14.2, iOS 14.1, iOS 14.0.1, iOS 14, iOS 13.7, iOS 13.6.1, iOS 13.6, iOS 13.5.1, iOS 13.5, iOS 13.4.1, iOS 13.4, iOS 13.3, iOS 13.2.3, iOS 13.2.2, iOS 13.2, iOS 13.1.3, iOS 13.1.2, iOS 13.1.1, iOS 13.1, iOS 13, iOS 12.4 .9, iOS 12.4.8, iOS 12.4.7, iOS 12.4.6, iOS 12.4.5, iOS 12.4.3, iOS 12.4.2, iOS 12.4.1, iOS 12.4, iOS 12.3.2, iOS 12.3.1, iOS 12.3 Ziyu is a Jailbreak Repo extractor. It will install a jailbreak app that extracts jailbreak repos. You can download it from the official ziyu website or third-party app stores such as zJailbreak, Xabsi or iExtras.It is available in many popular repositories to install jailbreak apps. iOS 13.3, iOS 13.2.3, iOS 13.2.2, iOS 13.2, iOS 13.1.3, iOS 13.1.2, iOS 13.1.1, iOS 13.1, iOS 13, iOS 12.4.8, iOS 12.4.7, iOS 12.4.6, iOS 12.4.5, iOS 12.4.3, iOS 12.4.2, iOS 12.4.1 from the App Store. Exclusive Anzhuang on zJailbreak Anzhuang & Xabsi app stores. You can install a large number of third-party apps, changes, and simple themes using Anzhuang for iOS versions. compatible iOS versions – iOS 12.1.4, iOS 12.1.3, iOS 12.1.2, iOS 12.1.1, iOS 12.1, iOS 12, iOS 11.4, iOS 11.4.1, iOS 11.3, iOS 11.2.5, iOS 11.2.2, iOS 11.2.1, iOS 11.1.2, iOS 11.1.1, iOS 11.1, iOS 11, iOS 11.0.3, iOS 11.0.2, iOS 11.0.1, iOS 11, iOS 10.33, iOS 10.3.2, iOS 10.3.1, iOS 10.3, iOS 10.2.1, iOS 10.2 Read more about Anzhuang from here. Velonzy Jailbreak app installer Velonzy is a jailbreak app installer for the latest versions of iOS. Use the UDID registration method to install jailbreak apps/changes for the latest versions of iOS. Both the online method and PC support methods are available to install Velonzy. We recommend that you use both methods to install multiple jailbreak apps/changes because the available jailbreak app collection differs from each other. compatible iOS versions – iOS 11.4.1, iOS 11.4, iOS 11.3.1, iOS 11.3, iOS 11.2.5, iOS 11.2.2, iOS 11.2.1, iOS 11.2, iOS 11.1.2, iOS 11.1.1, iOS 11.1, iOS 11, iOS 11.0.3, iOS 11.0.2, iOS 11.0.1, iOS 11, iOS 10.3.3 Click here for more information on Velonzy. 03. Jailbreak based on GUI tools This was the most successful jailbreak method for iPhone models and older versions of iOS. This is a permanent jailbreak method for iPhone without problems called jailbreak without tethered. This means that when you turn off the iPhone and hang up, the iPhone starts completely and the kernel will be patched without the help of a computer or apps. SeasOnpas, p0sixspwn, evasi0n, Absinthe, TaiG, Pangu 8 and PP Jailbreak was the most popular method for older iPhone versions and models. The last jailbreak tool without tethering was Pangu 9 for iOS from 9 to 9.0.1. jailbreaks are very rare nowadays because it is a very advanced method and more difficult to achieve. Checkra1n Jailbreak is a semi-tethered GUI-based jailbreak for iPhone. It is a semi-tethered GUI-based jailbreak for iPhone. This type of jailbreak is also very rare. 04. Jailbreak JailbreakMe browser-based was the first browser-based jailbreak for iPhone. This jailbreak works by browsing the site in the default Safari browser for iPhone and slipping to jailbreak. It needs to run the jailbreak app or whatever. Jailbreak.ME was originally developed by the Comex hacker for jailbreak versions from iOS 4.3.3 to iOS 1.1.1. This was updated by tihmstar for iOS 9.3.4 later. What you need to do is visit the JailbreakMe 4.0 website in Safari and tap the jailbreak me button! to jailbreak your iPhone. This is the easiest one-click jailbreak solution for iPhone. 05. Pigsy Online JB Pigsy has been the universal online jailbreak solution for many PC-supported jailbreaking tools. It wasn't a jailbreak software or tool. Pigsy installed the most compatible Jailbreak IPA based on your iPhone and iOS version without using your computer (online). So users could use this IPA to jailbreak iPhone. It was exclusive with the third-party app stores zJailbreak and Xabsi. However, it is no longer available and has been interrupted by the developer. Frequently asked questions about jailbreaking iPhone software Jailbreak is available for all iPhones? Yes, Jailbreak is available for all the latest iPhones, even iPhone X. But the latest versions of iOS can't be jailbroken. You can use the Jailbreak app installation method for these latest versions of iOS. Is jailbreak iPhone software uns guarantee-free? Yes, but whenever you can update or restore your iPhone and request iPhone software warranty. Is iPhone jailbreak safe? Jailbreak of the iPhone is safe unless you install cracked/hacked apps from untrusted sources. Is there a way to install jailbreak without updating firmware? No, you need to install system apps, themes, etc. Can I remove jailbreak from my iPhone? Yes, you can remove jailbreak by simply restoring and updating your iPhone using iTunes. Do I need to have a Windows or Mac computer for jailbreak? No, jailbreak online possible with Slizee. Do I have advanced technical knowledge of jailbreaking my iPhone? Lol We recommend that you follow our guides above based on your version of iOS. Why we need jailbreak iPhone All users have to jailbreak their iPhones to remove all apple iOS restrictions and most impressive features on their iPhone. Usually, Apple does not allow regular users of some of the most important functions as follows. Jailbreaking is the only solution to get the features mentioned below for iPhones. Basic restricted features: Users can't install themes or personalization apps. Apple doesn't allow us to use new ones with their old iOS devices. ex - Jailbreak users can use 3D touch apps, Siri, new emoji icons, and more just like the new iDevice features. Users cannot install system apps/changes on iPhone.Users cannot directly download third-party apps from other sources. They can only download apps from the Apple app store. Users cannot use Bluetooth files. Features with advanced restrictions: Apple does not provide application extensions. No game coins/diamond hacking apps are available. The user cannot use advanced system-related apps such as spy app, call recording app. Difference between jailbroken and non-jailbroken iPhone Jailbroken iPhone users can install new features without updating the firmware version. Jailbroken iPhone users can install apple's latest features via jailbreak without updating firmware. But non-jailbroken users cannot install the latest Apple software update. Non-jailbroken iPhone users can only install Apple-approved apps from the official store. Jailbroken iPhone users can install any Apple dissenting app. Jailbroken iPhone users cannot claim Apple warranty (without recovery or update). Uneated iPhone users can apply for Apple warranty at any time. The battery drain problem is a big factor less than iPhone devices. But Jailbroken iPhone users can increase battery life more than non-incarcerated users. Jailbroken iPhone users can use custom ringtones. But only non-jailbrokens can add predefined ringtones or Apple-approved ringtones through the official app store. Popular jailbreak apps for iPhones/changes Following the popular jailbreak/change apps must have on your jailbroken iPhones to customize it. Most of them work well with the latest iPhones. Snell Snell is a fantastic jailbreak change for iPhone. It is compatible with iPhone 11, Pro Max, Pro, iPhone X, iPhone XR and other iPhone models. Snell provides alert message customization capabilities for iPhone. It gives a modern and clean look to your iPhone's warning messages. Snell Jailbreak tweak customizes almost everything on your Jailbroken iPhone. In the settings you can find so many customization options for your iPhone with editing Snell Jailbreak. Snell also provides pre-set customization options, or you can save your iPhone customization themes using this. Dyan Dyan is a jailbreak app for iPhone related to the notification banner. You can change the size. the radius, the size of the Dyan settings icon. Here's Dyan's installation link. You can also change the status bar settings, button settings, profile picture on your iPhone using Dyan jailbreak editing. Since this iPhone jailbreak change, you can enable or disable the profile picture of notification banners for some Apple. You can enable or disable the profile picture of notification banners for some Apple applications and alerts. Springtomize 5 Springtomize 5 is another useful jailbreak change for iPhones running iOS 13 and later up to iOS 13.6. It gives full control to customize iPhone settings. Colorful status bar notification, custom notification sounds, custom time setting, custom volume level, and more. DockSpring DockSpring offers a respring option for the iPhone HomeScreens dock. Jailbroken users know that respring is very important to them. You can download DockSpring iPhone jailbreak tweak from packix repo. If you are on iOS 11 or later iPhone user, you can easily re-count your iPhone with DockSpring tweak. Jailbreaking hardware for iPhone Jailbreaking hardware is the latest trend of Apple Jailbreaking. You can use some parts of iPhone hardware features. Ru $za, Pangu8 developers and some hackers have started hardware programming for the latest iPhones such as iPhone 5, 6, 7, 8 and iPhone X etc. Some simple parts of the programmed hardware will make a big difference on your iPhone. Here are some of the few. Change the color of the Apple back logo - Must install the Apple glow LED light logo on your iPhone. It never requires battery consumption for this product and there is no need to weld it. I just want to replace the Apple glow led light logo instead of the original logo. However, installation is not an easy process, if you do not have technical skills on iPhone assembly. Use dual Sim on iPhone : Dual SIM adapter is the way to get this option on your iPhone. The adapter consists of an easy-to-install process. Make the original sim tray and place the thin part of the Dual SIM adapter in the tray. Other parts of the card can install regular SIM cards. Increase iPhone external memory - It can add external memory for your iPhone with easy installation. This method never asks you to connect to the Internet to sync files. Just plug in the external device to increase the memory. The memory adapter consists of Apple Lightning & USB 3.0 and is wireless. Configuration Speaker Lights - Can configure speaker light for the device as hardware jailbreak. Just place the glowing light near the speaker position according to the guide. However, installation is not easy, if users do not have some skills on the iPhone hardware. Hardware.
