Categories Search One of the most important things when starting up a new studio is a good and sturdy workspace. It is like the vehicle for your creativity. Make sure it is located close to you, comfortable, safe and healthy. My requirements for a new desk were: It must be light and easy to set up and transport, Its size must be large enough to accommodate all my speakers, my PC, my two monitors and a lot of other things and be enough stable for a 12-14 hours daily work load and It has to be somewhere close to me, because in any case the studio is a place where I am working and the headphones are as close as possible. Eager to get a new desk, I visited a few furniture manufacturers and shops, but it soon became clear that everyone had their own ideas on the design of a work desk. Thus I went back to the drawing board and started thinking about what I wanted and what I needed. The first idea I had was to make a workstation based on a table that could be folded up and placed in the corner. However, as a final daydream I had a picture of a simple and elegant design in my mind, which I wanted to try out. That's how the Nexus DFD chair came into existence. What is it? The Nexus DFD chair is an innovative design of a work- and home-chair. It is designed in the shape of a triangular prism, with a minimum of 10 cubic centimeters storage capacity and 15 liters storage space for your notebooks, USB sticks, cables, etc. If you are tired, you can place the Nexus DFD on your shoulder and relax while your productivity increases. The Nexus DFD chair is designed to make you feel at home and give you the feeling of being in your own office. I created the Nexus DFD chair myself, with the help of my father-in-law and a lot of love. I wanted to create an office chair that is different, that differs from the usual designs, that is ergonomic and ergonomically correct for the back and shoulders. How does it work? There is a large and elegant black stainless steel triangular prism in the middle of the Nexus DFD, with its frame wrapped around the edges. It is made of high quality stainless steel, and has a separate light-adjustable armrest.
