Bdo boss location

World bosses at Black Desert Online, offer a nice PvE-side to play, and more importantly, they can fund you with the most coveted boss-gear you can find! Let's smash each of them and discuss where you find them, how to learn about them (therefore better damage & better drops), as well as the attacks you should expect and the strategy you should follow not to die (too many times). Kzarka, Lord of Corruption – Kzarka's Main Weapon, Corruption Lord, Head of the World, Black Desert Online (photo @MotherOfHarlots) Kzarka is the easiest to achieve and easiest to kill the head of the world in BDO. It may not be the easiest to keep alive, but almost always the amount of people fighting a quasar is enough to kill him in 5 minutes or less. Kzarka's location appears deep in the Sanctuary of Serendia, just minutes south of Heider. This is by far the most popular boss because it has the most weekly spawns among all the other world bosses, and it's good that boss-gear's main weapon drops that all classes are after, especially when it starts in the game. Kzarka Spawn Location, World Boss, Black Desert Online Knowledge Increase amity with Hakkon, node manager Serendia Shrine. Once successful, you'll see Kzarka's health bar, and if you're lucky and get S knowledge, you'll get a bigger change in your boss's weapon. Hakkon, Node Manager at Serendia Shrine, Kzarka World Boss Knowledge Strategy & Kzarka Attacks can easily be considered one of the easiest bosses to kill (because most of the time it is full of people), but at the same time it is one of the hardest to die because there is only one special attack that is dangerous for 1-shotting you. Claw Kzarka attacks a fairly small area in front of him. Easy to avoid if you make sure to stay on your back. Breathing Damages the area in the cone to one pillar. This area will be marked just before the start of the AOE. Hide behind this one pillar or just get out of the marked area to avoid this attack. Fog The whole room centered on the Kzarka and ending with pillars is covered with deadly fog. When you don't escape this ability, it will kill you. Most people usually pay attention to it when everyone is fleeing Kzarka and then following it. Meteors Small areas circled are marked and then hit by meteors. With low health and DP, this attack

can kill you. However, it is easy to avoid. Loot Kzarka's Sealed Weapon Box (photo by @Shokugekii) The most important drop of Kzarka is the Closed Box of Kzarka's Weapons. This drop easily saves 100 million silver during early play, because the purchase will cost about as much. He also throws hunting seals, black stones and various crystals. An alternative to the Kzarka Sealed Weapon Drop Box is getting 100 Latent Aura from Kzarka, They allow you to create a closed field of weapons as well. In my opinion, on average you get 3 aura for every 2 times he was defeated. Karanda, Queen of Harpie - The Awakening of Karanda's Weapons is the second boss discussed today. Harder than Kzarka, but easier than other bosses she does to get a nice step on a BDO trip. Karanda's location is located on Karanda Ridge, which is located north of the Knights of Delphe and Calpheon Castle. When you go up, you will easily encounter it. Karanda Spawn Location, World Boss, Black Desert Online Knowledge Increase amity with clarkster node manager from Karanda's back. To increase this, you need to gain knowledge about the harpies there, and then talk to him. Clarkster, Node Manager karanda Ridge, Karanda World Boss Knowledge Strategy & Attacks Claw/Wing Slash Close ranged standard attack. Easy to dodge as long as you stay behind her. When you catch aggro she will turn to you with this attack. Shriek Shriek is a standard karanda attack. When you catch aggro and you are out of reach of her claw attack she will scream to attack you. This is a projectile attack that follows you and deals moderate damage. If you run away in a straight line, it can still strike because it screamed before you left your range. Hiding behind various small obstacles in its spawning will make you clear as well. Harpies Attack She will fly into the air, unlike Ascend and summon her subjects. With Karanda's help comes an army of harpies. These harpies are not very strong, but still capable of dealing damage at low DP amounts. Try to stay with a group of players also on stage to deal with them quickly and not taking too many aggro of them yourself. Ascend AoE attack from close range, which is easy to avoid when you know the animation. Karanda knocks to the ground, jumping into the air immediately. You want to make sure to get away from it as soon as possible to avoid the fatal featherdaggers fall that follows. Slow Ascend Attack AoE Long Range. Just as easy to dodge as Ascend when you pay attention. For this attack, Karanda does not hit the ground, but simply flies slowly. Feathery rain falls in a wide circle around it. Move close/below it to avoid this attack. Loot Karanda drops the best awakening weapon in the game through the Dandelion Weapon Box. Next is, as in the case of Kzarka, a chance for crystals, black stones, silver, gold bars and hunter seals. Karanda also drops feathers. Ancient Kutum – PvE Sub-Weapon Ancient Kutum, World Boss, Black Desert Online (photo @MotherOfHarlots) Kutum is in my opinion the toughest of the 4 normal world bosses in BDO this is the ultimate control of skills on themselves and reaction time. The boss attacks quickly and deadly, but when you have control over his movements, it will be a lot of fun. Kutum's location is located in the Desert. You don't have to travel in the desert to Star Anise Tea and purified water are a must. To reach it, you travel up in Valencia past Cadry Guardians. Kutum Spawn Location, World Boss, Black Desert Online Knowledge Kutum Knowledge can be gained by increasing amicability with Desalam. Archaeologist found in front of his cave. There is also a task that allows you to gain knowledge. You need to find 5 artifacts in the cave and talk to two other people to get them. This probably doesn't result in high-end knowledge, which makes increasing amicability with Desalam a leftover choice. Both quest and Desalam can be found here: Desalam, archaeologist, Kutum World Boss Knowledge Greet Desalam from us. Strategy & Attacks Cleave Kutums standard melee attack. Multiple hits, the first of which deals a lot of damage. Kutum has an animation (he's a bit pents up) before each cleft, so you'll see it coming. I recommend over 200 Dp for Kutum just because of this attack. The first attack causes stiffness, so when you do not avoid, everyone else hits you. Spit Kutums standard ranged attack. He deals minimal damage and he will only use it if you are taking aggro from afar on the edge of the cave. Burrow He kicks himself in the sand to jump twice. The attack deals high damage and involves knocking down a large area around a place that won't kill. Classes with the block can stand idly by on site. If you face Kutum, it does no damage. If you do not have to deal with it the damage is minor. If it doesn't work for you try to leave the chamber until it's overburdened. Appear after his two attacks Kutum will deflect in the middle of the room and deal damage to everyone close to the center. Kutums vacuum the strongest attack. It loads for a while before using it, so you can see it's coming in time. The range is long, so it's best to lock it. Super Kutum reaches 50% HP and Kutum is crazy. It will burrow and instead of attacks immediately appear in the middle of the room stronger than before. The entire cave will be damaged by lightning, which can be blocked if your class allows it. Otherwise, you should run out of cave. All of his attacks will deal more damage, and from now on another lightning strike will be used. Lightning After Kutum rages will be 1-2 times on the fight to use a lightning attack AoE, which basically covers the entire room, but a small area around it. Since the animation is different from vacuum attack or cleft, it is quite easy to see and therefore to dodge by moving close to it. Loot Kutum's Sealed Sub Weapon Box is the second weapon gear boss in the game. Very important for late pve grinding game because it gives you a lot of accuracy and dp that allows you to hit these monsters in Hysteria and Ghylfins, but also survive their attacks. Further Kutum also drops Latent Auras, Black Stones, Silver and Hunter Seals. Nouver -- Sub-Weapon Nouver, World Boss, Black Desert Online (photo @MotherOfHarlots) Massive dragon and in my opinion the current coolest boss at BDO. Its harder-to-reach location makes it less popular than others. The location southeast of the Grain Sand Bazaar is not as frighteningly deep in the desert as most people think. Be sure to stock up on star anise tea and purified water. Nouver Spawn Location, World Boss, Black Desert Online Knowledge Learning about this boss is a little more annoying than others. You need to go to Ibellab Oasis, which is located in the desert. Ibellab Oasis, Location Nouver World Boss Knowledge Worth bringing energy tonics as well as anise tea and water. With energy tonics, you can reset your knowledge as many times as you want until you get what you wanted A+ or S. This would mean that before you go here, alt space in the Calpheon library, where it will cost 10 energy to reset. Then it will cost 35 energy to refresh your knowledge by taking to Eugene in Ibellab. Once properly prepared, you search for Eugene in Ibellab and complete his three missions. They are all the same, you need to find a book near an oazy in the desert. Eugene, Stable Guardian of Ibellab Oasis, Nouver World Boss Knowledge Before entering the oasis, use the map to position yourself at right angles and then just run into the desert until the task wheel (small yellow dot) appears on the minimap. After the third mission you will get the knowledge by simply talking to him. Strategy & Attacks Claws Once again we start with the most used attack. Nouver quickly rotates his body to 180 degrees to cut the claw through the air. It stops at a player who is taking aggro at the moment, which means he can sweep the entire distance or only a small part. He lifts his paw shortly before rocking, so when you're fast, you can avoid it. Body Slam Nouver raises its wings, winding up a little in one direction and then punching the other way around. The hitbox includes a 90 degree angle from head to back of the legs and a smaller hitbox on the opposite side where its tail and legs move. As a distance class, it is recommended to withdraw. As a melee you can try to dash through your legs to the other side when it starts winding down. However, watch out for the tail, as you can still be hit. Nouver jumps and crashes to the ground to deal damage. Before jumping, he squats like a predator. He squats in the opposite direction of the jump and can jump to any side, even backwards. Fire Breath Just before using fire breath Nouver will lift the upper half of the body. He can breathe fire more than once, but he raises his head every time. Either dodge sideways because it's a small cone or try to dash past it when it starts lifting your head to get in some free attacks on Back. Burrow/Sandstorm Nouver burrows underground leaving the sandstorm behind. The storm doesn't move, but it can knock you down when you're caught in it, making you vulnerable to its multi-attack. When you're caught in this spam-echemmering skill to get out. Nouver's flying breath of fire flies up and fires at his rivals from the sky. When hit, this can cause knocks down, which threatens to hit you multiple times as it often targets the same place more than once. Relying on sound to avoid this attack works better than sight because the fire moves very fast. Loot Nouver's Sealed Sub Weapon Box (pictured according to @YKira) Now a prize for learning this world boss, Nouver's Closed Sub Weapon Box. The best PvP weapon in the game and an important item for each class. Nouver then qualifies for Latent Aura, Black Stones, Silver, Crystal and Hunter Seals, as do other bosses. Offin, Destroyer Mirumuk – Offin's strongest main weapon, the Mirumuk Destroyer, world boss, Black Desert Online (photo @TheGuardians1) of Offin is the strongest boss of the five. I recommend at least 250 DP for this boss and the right amount of potions. Use equipment without crystals if you don't want to lose them and EXP. Valencia's meal or steamed whale meal should be great to take as well. Location In Kamasylve, north of Central Lemoria Camp very close to the mountains lies the Ruins of Mirumok. Offin Spawn Location, World Boss, Black Desert Online Knowledge to gain knowledge on Offin you need to increase amity from Anbelif to Old Wisdom Tree. Anbelif, Old Wisdom Tree, Offin World Boss Knowledge Strategy This boss is much less well known than others. A quick explanation would be that Tett controls Offin from inside the machine. The cockpit is guarded, but you can shoot it with matchlocks until the break. The second strategy destroys its roots. When the last root is destroyed, Tett will come out and you can fight him. There will be 3 Tett, but yellow is real. Two blue Tett's should not be attacked, but you want to be careful how his spear charge attack will be fatal when all three Tetts throw their spears at the same time. The spear lands in the ground and deals AoE damage around the affected area. When the first root is destroyed Tett will come out of Offin. When his HP has stoned to 70%, he will re-enter Offin. Then, when the second root is destroyed Tett will come out again and then move to Offin again when it drops to 30%. When you destroy the third root Tett will come out one last time to kill once and for all. If you broke the cockpit with matches, Tett will not re-enter the cockpit, which means that you will have to destroy only the first two roots. Loot you can get boss's new main hand from the Offin Tett Closed Light Weapons Box or by exchanging 100 Light Tett Fragments with one weapon. The Offin Tett's Light Fragment acts as the Latent Aura of other World Bosses. Dizzipo blacksmith in Graan will be a weapon for you. Other prizes include valtarra's Black Belt, silver, gold bars, black stones and the Lemoria set. Set.
