Marcus, J., Hans, S.L., Byhover, B., Norem, D. (1985). The relationship between neurological function, intelligence ratios and physical deviations. Bulletin on Schizophrenia, 11, 85-100. Marcus... The purpose of this guide, originally published in 1984, is to provide a compreh-sive overview of current clinical descriptions, studies and theories of psychopathology. Descriptive psychopathology is ?eld, which forms the basis of clinical practice and research in clinical psychology, psychiatry, psychiatric social work, psychiatric care, and related professions in mental health. Since The 1st edition, editors have developed and updated a guide to cover both general and speci?c topics in psychopathology that would be useful for researchers, practitioners and graduate students or other advanced students in mental health and behavioral medicine professions. To implement this plan, we have very carefully selected colleagues whom we respect for their experience, in particular?elds. These authors include both clinicians and researchers who have an outstanding national reputation, as well as younger behavioral scientists and clinicians, who, in our opinion, will achieve similar recognition in the future. Excellent chapters in this book lead us to what we have chosen wisely. We would like to thank these authors for their outstanding contribution and cooperation. In the high-risk group it has been suggested that more comprehensive tiered prevention and health promotion ... Guidelines in these two countries have been provided by their respective colleges of obstetrics and gynecology and ...
