Make sure you have a PDF viewer installed. My 10 Small Swing Guitar Exercises course is currently on Soundslice: I'm available for one-to-one training, but because I play in two bands and full-time seats are limited. Currently I only teach at Muswell Hill N10 on weekday evenings. If you are interested in taking lessons with me, please let me now through the contact form Building a strong melodic guitar solo is one of the most important improviser skills needs, especially when solo in the style of gypsy jazz. You have to use solid building blocks for the structure and present your solo in seamless, engaging stories that your audience will want to listen to. Master Gypsy jazz guitarist, Rainier Voet focuses on this important skill here in these 5 free guitar lessons from his gypsy jazz melodic Solo guide. He demonstrates how to use melody melody as inspiration and then decorate it with various improvisational instruments and techniques. You'll learn how to spice melodic solos with minor 6th arpeggios, chromatic runs, newt substitutes, diminished runs, and more. Swinging Minor - Concept: m6 Arpeggios Download tab, notation and jam track for this gypsy jazz lesson on TrueFire. When you are able to find and play the most common minor 6th arpeggio and their fingers, it will give you plenty of opportunities to solo over minor progressions. As mentioned earlier, minor 6 arpeggios give you that gypsy jazz guitar sound. So, anywhere where a normal minor chord plays, use a minor 6 arpeggio in your solo. Another interesting use of the minor sixth as a substitute for the dominant seventh chord. For example, play the Arpeggio B6 over the E7 chord, which results in the sound of E7/9. The similarities between the Bm6 chord and the E7/9 chord are obvious. Just look at the chords! Georgia in the City - Concept: Tritones tab, notation and jam track for this gypsy jazz lesson on TrueFire. Using newts gives you a sound that distinctly jazzy. It's an easy way to change the dominant 7 chords, making them sound hip and a bit of dissonance. Take a look at the explanation about the newton in the section on Small Swing. In this example, I apply the newt concept in the same way. Of course, it sounds different because it's a different piece. But the same principles are used. Listen to my example. The thing is a thing! - Concept: Decreased Download tab, notation and jam track for this gypsy jazz lesson on TrueFire. Next, I would like to explore the use of diminished arpeggios. The beginning of the melody What is this thing called love is already a minor third. The B part also starts with a small third, making it an ideal candidate for using reduced arpeggios. They repeat the minor 3rd intervals. I'll also play a decreased arpeggio over the dominant 7 chords that solve their root chords. For example: from C7 to F minor, or G7 to C, or F7 to Bb, etc. But first: Look and listen; I'll explain it later in the breakdown. Clouds - Concept: Arpeggios Download tab, notation and jam track for this gypsy jazz lesson on TrueFire. The Nuages melody really invites us to use arpeggio to decorate it. That's because it's nice to break down the ever-downward chromatic lines of the song. As an added benefit, you illustrate harmony by playing notes of chords. The word arpeggio means a broken chord. Applying arpeggios in this way really anchors solo chords. At the end of the melodic line, there is often room to decorate the arpeggio, especially in slower ballads like Nuages. I'll play an example solo with some arpeggio lines performed right after the melody where there's still time left at the bar. So listen and count together. This way you'll know how many punches are left and when you can fill the space with some extra lines. Sweet Atmosphere - Concept: Licks Download tab, notation and jam track for this gypsy jazz lesson on TrueFire. The Douce Ambiance Bridge is complex because it consists of only one chord for the first 4 bars! This gives us plenty of time to explore a few licks. You'll find some classic licks on my 50 Gypsy Jazz Licks You Should Know. of course. In my Gypsy Jazz Guitar Guide course, I suggest using this famous standard of licking in Douce Ambiance. To avoid a repeat, I'll use another one this time. I also recommend sorting out some solo lines from other guitarists, and not just Django! You will probably find some good things that you like to use in places that you would like to make them necessary. I found Bulu Ferre, son of Matelot Ferre, to have some interesting, original minor tricks that we can use to pass Douce Ambiance Bridge. Listen to these in my example solo! LESSON PRESENTATION - Romane (Image credit: GAB Archive/Getty) Guitar skills: Pioneering Django Reinhardt, this jazz style grew out of Paris in the 1930s. Listen for chromatic licks, swing feel and unusual sound diminished and dominant chords. What you need to know: Selmer-Maccaferri's acoustic guitar is closely related to the genre and Django Reinhardt. Gitane Guitars now make available versions. Tone: Closer to the traditional tone, using silver copper or steel strings on an acoustic guitar. But playing further back to the bridge with a thicker pick will serve you well, especially on an arch or classical guitar. If your electroacoustic guitar has a graphic ecu as part of its pre-am remainder, lift the middle range a bit. Tip: Semitones question here - Try playing the notes of the main chords by adding a half-ton over each note as you go. This trick lays out a true gypsy-style melody (see G chord below).
