csv files with Tableau Desktop 10. Easiest way to deploy your workflow to all your workstations at once. Who is it for? This plugin is designed for people who have adopted Tableau to manipulate data. It works as follows: There are three types of users.

The first type are people who have no idea of how to build their own dashboard and would like to use a .tsv file as a tool to publish data or manipulate data. They don't really care about Tableau capabilities as long as data can be displayed in dashboard form. The second type are people who have some Tableau experience. They are familiar with building their own dashboard and would like to share it with other users. They have no experience in deploying it. The third type are data scientists. They are proficient in manipulating data. They are already familiar with Tableau and have an idea of how to deploy a dashboard. What

does it do? It's an extremely simple plugin that does three things: Read and write to your desktop databases without any programming changes. Quickest and easiest way to go paperless. Easily communicate with your desktop .csv files with Tableau Desktop 10. Why it's needed? In order to have this type of plugin, you must have Tableau Desktop 10.0.0.0 and above. Tableau

Desktop 10.0.0.0 and above has this native function called Tableau Desktop Read and Write Local Databases . I know this sounds odd, but Tableau has already given us so much capabilities, we can't complain. Setting up 1. Create your own .tsv file or publish an .tsv file in your workstation 2. Go to your Tableau workspace, click on File and then on Desktop Databases 3. Create a new desktop database and name it YourName 4. Go to the desktop database you just created and click on New tab 5. Click on the Add file button 6. Select the .tsv file that you want to publish and click on Open to 520fdb1ae7
