They are mostly decorative, small and spherical cute items that first appeared in the Slime Rancher Wiggly Wonderland update. Their second batch was presented in The Party Gordo Update, and three more appeared in the optimization update. Now the game has 38 unique colorful ornaments. New creatures have the same difficult behavior as chimes and echoes. They float on the spot after being shot out of your mechanical Vacpack. Once the game-related event is over, all the decorations you've managed to collect will remain. They can be assembled during time-limited special events at Slime Rancher. The developers of the company announce in advance about the new appearance of Ornaments. These cuties are usually available from midnight. It is also known that they appeared in boxes on the ranch. Each of these boxes can have one of three unique decorations. There is another chance to get jewelry. Taking part in a seasonal giveaway, taking screenshots of the festive show at Slime Ranch and sharing it with friends, adding the hashtag. The first appearance of ornaments took place from December 20, 2017 to January 1, 2018. There were 15 ornaments appearing in this period of time. It happened while celebrating Wiggly Wonderland inside the game. After that, 20 more earrings. It happened during the party weekend, in the edition of Party Gordo. During the week, two types of ornaments were presented. However, there was almost no chance to catch seasonal decorations. While all of these ornaments look like small colorful balls, they have different theme decorations. Some of them look seasonal. For example, there are Jack Ornament with Jack's pumpkin head on it, or a Clover ornament with a clover inside that reminds us of St. Patrick's Day. Snowflake Ornament with a white snowflake on a light blue background brings Christmas associations. Others have the faces of birds or just stripes on them. Almost all of Slime Ranch decorations have echoes in them. In addition, all of them were created on the basis of trinkets. And while it's not possible to get decorations outside of special date events, the game still runs away from your computer clock. We strongly discourage you from messing around with your computer clock to get decorations. This can cause problems with the game's backup. You can do this at your own risk. Briar Ornaments will be available between 26 and 28 April 2019. Saber Ornaments have no associations. Meanwhile, a Crates party could still be available after the weekend party. If you find and open it, there is a chance that you will catch pink or rare species. Jack's ornaments can be contacted from October 30 to November 1. How to get jewelry? As mentioned above, you can cheat the system and change the date on your computer. Make sure the game is off when you do it. But it's really tricky and risky and you can have problems with the system and the game after that. Another option is to look forward to new seasonal events and holidays. It's easier. There are new holidays that are coming soon. All you have to do is remember the dates of these holidays and enter the game during them. And don't forget to attend the game at the weekend. Why do you need jewelry? Well, the first obvious reason is that they're too adorable. The other is that you can assemble the whole package. After that, you can tell your friends about them to take photos of them and place in the note. Do you need more reasons? Obviously they were made to be decorating your ranch. So they are mostly useless to many of us. Especially if you have collected a lot of Christmas decorations and now July, and you do not know where to hide them, so as not to remind you of winter. However, if you want to make your farm beautiful, you need these decorations. You can always try to mark the treasure pods that you can't open at the moment with them. Slime Rancher is a fun and easy game. Its ornaments should not go with some deep feeling behind. The basic idea is to have fun and be as creative as possible. Decorate your ranch with these glowing creatures and View. View. View.
