Works well and without problems for the last year. Filters are expensive, but have found some at Lowe's cheaper. Whirlpool remains in contact frequently by emailing information about its products, some useful some not applicable. Would I buy that fridge again? Yes, I love the ice machine, it is quite large (enough to fill a small refrigerator), and the convenience of crushed or cubed ice is pleasant. Most people complain that the engines are noisy, but we don't experience that. Marcie of Carpenter, SD Verified Reviewer Original review: Aug 25, 2020I bought my Whirlpool fridge side by side for over 13 years and have had no problems with it so far. One complaint, however, is the plastic slip of drawers that tend to become brittle over time and cracks making it difficult to keep them on track. The side-by-side style isn't the best for storage where each side is fairly narrow, although I don't know if having the sliding freezer at the bottom is the perfect answer, too. Overall, I can't complain about the price or reliability of whirlpool products! Andrea de Powell, Wyoming Verified Reviewer Original Review Review: August 23, 2020When we bought our house in 2017, it came with side by side, refrigerator/freezer with ice maker and water cooler on the door, stainless steel finish. he's four years old. It had a two-year warranty, (expired in 2018). So far, it's never required maintenance. The temperature control works very well, both the refrigerator and the freezer maintain very suitable cold temperatures with minimal cost to operate. The ice ice Allows the user to choose between crushed ice or cube, along with the option to turn off the ice machine when it is full when it is not needed. The dispensed water remains cold and the water filters are economical, less than \$25 that last about 6 months each. The shelves on both sides are spacious, adjustable and easy to clean, as are the two crispiest drawers in the fridge and the freezer drawer. Door shelves on both sides are also spacious and adjustable. The stainless steel exterior is easy to clean and hides fingerprints well. We are very pleased with the functionality and aesthetics of Whirlpool side by side fridge/freezer and highly recommend anyone on the market for one. Read Janet's full review of Barnesville, GA Verified Reviewer Original Review review: August 21, 2020The shelves in the newer units are non-glass plastic with metal and they tear/break holding heavy contains like gallons of milk, and they are more expensive to replace. I just wanted them to go back to building things like the old days. My last refrigerator lasted 20 years. I have this per year paid double the price and already had to replace shelves and trays with it. Umakanta from Imphal, Manipur Verified Reviewer Original Review Review: August 20, 2020 Whirlpool refrigerators are better whenever I've used many refrigerators. It provides many useful services to users. It allows us to store different varieties of products including vegetables, fruits, drinks and more. It can make ice cube to use in different drinks, products, etc. It consumes less energy to use this Whirlpool cooler. We use Whirlpool refrigerator with less stress of storing fresh vegetables and fruits. Water is the main thing we used to store in this refrigerator, it keeps the temperature well for the fresh and fresh taste of nature's nectar. Nowadays, the refrigerator is widely used in our locality especially the Whirlpool which I mentioned earlier to buy this amazing product to give comfort to humanity. I recommend Whirlpool refrigerator. Richard of Birmingham, AL Verified Reviewer Original Review Review: November 13, 2020Ordered & paid 6/9-delivered 7/29--ice maker issue day 1--ice clumped clogged kick --call--ice maker & valve warranty replaced 4 weeks later due to unavailable parts from Whirlpool - same problem - Wh technology technical support irpool to order the board to solve - 4 weeks until the board arrived - contacted-contact - contacted-contact-contacted - Whirlpool 3 times - no worries - no asst - board arrived & installed technology - same problem as day 1 - ice cubes freeze together and hang on for thlows - have to open door and clean ice of - Ice all floor----poorest excuse of the ice maker never - Maytag could not care less or offer any asst --DO NOT EVER BUY MAYTAG APPLIANCE IF THE SERVICE IS IMPORTANT. Peter of Ridgeland, MS Verified Reviewer Original Review Review: October 29, 2020 We bought the WRS571CID** model that has an ice machine on the door that stopped working afterwards Three years. An excellent authorized service representative advised that the wire harness from the freezer to the door was damaged by normal opening frictionand freezer door closure, which caused the ice maker's wires to break, thereby disabling the ice machine. The only remedy is to replace the entire door, which would cost \$1,700 according to Whirlpool's published repair data, which he is required to charge. Apparently, the wiring harness is not a replaceable part, because I suspect that the work required to disassemble and reassemble the door is prohibitive. Well, a new refrigerator costs with repair. I spoke to whirlpool company about whether they recognize that the design is faulty and that the door should be replaced at their expense even out of warranty, and they refused. Therefore, I advise potential buyers to be aware of this issue and to attend other reviews. There are many customer reviews on multiple sites complaining about this same problem. Our workaround is to put ice trays in the freezer to make ice, and while the dispenser still works, pour the manually made ice into the ice dispenser - until the wire control also gets damaged and stops working. I wouldn't recommend buying this model. Read Prasad's full review of Bangalore, Another Verified Reviewer Verified Original Buyer review: October 27, 2020Post delivery even for installation or demonstration also no one has arrived. It's been over 10 days. I have followed the customer service, but so far no response of its end. Every two days the service request is terminated even without resolving the problem, it is the responsibility of customers to monitor customer service to keep the incident open. Herman of Colorado Springs, CO Verified Reviewer Original Review Review: October 24, 2020Because Korean appliances are a problem for reparators, we're stuck with a whirlpool choice. Looks like a good fridge. Nodded than my Kenmore (Korean). I received instructions from the repairman about opening the right door first and closing it last. Otherwise, the rubber wears out too early. If I put something on the left door in front of the ice maker, it freezes, making this shelf useless! We had ordered a Kitchenaid, but the installers damaged it. Beth of Ottawa, ON Verified Reviewer Original Review Review: October 22, 2020Stay away from all Whirlpool products. The appliances are terrible (broken twice for different reasons within 14 months of purchase). The waiting time of customer service is more than 90 minutes and technicians take more than 3 weeks to get home and do not repair, ask for the part and it takes another 3 weeks for it to arrive and the technician comes back. an extended warranty and when the refrigerator broke a second time, they canceled the warranty and said they had the right to cancel it as it was in the contract. Terrible, terrible company. I work in the service sector and I'm in shock that this company can get away with customers as they have. The best deals on Next Today's Whirlpool WRS321SDHZ search the latest refrigerators side by side, asked experts and sifted through thousands of specifications, features and user reviews to find the best refrigerators side by side around. Here's everything you need to know about the Whirlpool WRS321SDHZ fridge side by side. A variety of fresh food compartments Front temperature controls Can caddy to store beverages The Whirlpool WRS321SDHZ refrigerator side by side has many of the features we've been waiting for in side-by-side refrigerators in recent years. For a while, it has an ice and outdoor water dispenser with a built-in water filter. The icemaker is factory installed, which means you won't need to replenish ice trays to have enough ice on hand to entertain or a hot day. Whirlpool WRS321SDHZ's fresh food section features a deli drawer for meat and cheese, adjustable gallon door boxes for flexibility to accommodate all types of bottles and frameless glass shelves that offer maximum storage space. Moisture-controlled crisps keep fruits and vegetables fresh, creating their ideal environment. There's also a nifty tin caddy that keeps your canned or bottled drinks at whirlpool's door, freeing up space elsewhere for larger items and keeping your drinks within easy reach. (Image credit: Whirlpool) There is LED interior lighting that keeps energy costs low by reducing the heat created by more traditional methods, and the ice and water dispenser even features an LED night light to prevent any spillage and mishaps. There is also fingerprint resistant stainless steel exterior that cleans clean, perfect for families with children. The temperature of the Whirlpool WRS321SDHZ can be controlled electronically with front controls and adaptive defrost settings monitor your freezer environment and works automatically, giving you one less thing to worry about. Standard depth21.4 cubic feet, a small capacity not large enough to fit a gallon of milk What are the dimensions of whirlpool WRS321SDHZ? This is not a counter-depth model, which means that its 33.6-inch depth could stand out from your kitchen counter and lose that smooth, personalized feel. The width is 33 inches and the height is 65.6 inches, which is standard for side-by-side refrigerators. There is a global capacity of 21.4 cubic feet (cu. ft.) that is divided through 14.6cu. Ft. refrigerator and the 6.8cu. Ft. freezer capacity. This is an average ratio from fridge to freezer to a fridge side by side, but it can leave you a little shy in the freezer space if you have a large family. A Most frequent complaints we've seen is that the shelf at Whirlpool WRS321SDHZ is just high enough to fit a gallon of milk -- something to keep in mind if this shows up in your weekly shop. The best refrigerators side by side tend to have a capacity of 20-29cu. 20-29cu. so this is a small fridge that is best suited for a family of four at most. If you're after a larger capacity freezer, check out the Samsung RS25J500DSR/AA. Whirlpool WRS321SDHZ: Price \$1,399 - an average price model You can get larger refrigerators for this Ringing size at \$1,399, this fridge side by side is a low to medium price model that was on sale for \$1,199 when we reviewed it. One of the cheapest models we've seen, but without the extravagant extras we've seen with top-of-the-line models such as the LG Electronics LSXC22396D, which features door-to-door technology and an Instaview glass panel to reduce the need to open your refrigerator. That said, this is a good price if you are looking for a refrigerator of this size, and you get your money worth it with thoughtful touches such as the LED night light dispenser and can caddy. Whirlpool WRS321SDHZ: Efficiency & Worst Warranty Warranty we've seen No Energy Star certification The Whirlpool WRS321SDHZ comes with the worst warranty we've ever seen, with only one year of limited coverage on parts and labor. Many other brands we review have extended warranties of up to ten years on certain parts, which offers greater peace of mind to buyers. Overall, shoppers loved their Whirlpool WRS321SDHZ refrigerator side by side for its value for money and smooth operation. Some have reported that this model is high, which can be annoying from essential appliances. In addition, the Whirlpool WRS321SDHZ is not qualified by Energy Star, which means you can experience higher energy costs than with qualified alternatives. Whirlpool WRS321SDHZ: Our Verdict At \$1,399, this is a mid-priced cooler at a low. However, it has a limited capacity, given that it is not a counter-depth model, and people have complained that it does not fit into its essential comfortably. The caddy drawer and deli are thoughtful touches, but they don't make up the low warranty on whirlpool WRS321SDHZ, which is the worst we've ever seen. Overall, this is not our best choice for side-by-side refrigerators. Best French Door Refrigerators Best Mini FridgesBest Wine CoolersThe best Whirlpool WRS321SDHZ and offers
