Wad support. I needed that to be able to play the PS2 games I own but I'm not too sure how to use the GSDX mod to include it.

This is a mod that allows PS2 games to play on your PC without having to change any settings or screw around with your computer. No hacking, no funky stuff, just plug in your PS2 game and start playing. Add as many PS2 games as you wish and get back to gaming. Currently the PS2 games which you can play with this mod are: Game Name Playstation 2 Action RPG Super Paper Mario Sly Cooper Mortal Kombat 4 Batman The Brave and the Bold Hakumen Godzilla: Save the Earth Gex: Enter the Gecko Puzzle Quest Street Fighter 2 Turbo Mortal Kombat Guilty Gear Full Metal Alchemist Grand Theft Auto Spec Ops:

The Line The Last Of Us Red Dead Redemption Dark Souls Dust: An Elysian Tail LoN Jak And Daxter Ratchet & Clank Catherine Saints Row 2 JoJo's Bizarre Adventure Splatterhouse Portal Final Fantasy XII Metal Gear Solid Metal Gear Solid 2 Resident Evil 2 Undertale Persona 4 Arena Persona 4 Golden Persona 5 All I ask of you is that you enjoy the games and leave a review. I'd really appreciate that. At this point it's worth mentioning that some games, namely Mortal Kombat 4, and Batman: The Brave and the Bold, seem to be broken. Super Paper Mario is also no longer loading. PS2 Action RPG and Gotham City

Impostors are bugged at this time. The glitch and some bugs are getting fixed and updates will be coming soon. Thanks for reading, have fun and let me know if you enjoy this mod. If you encounter any issues, do not hesitate to contact me. Also feel free to leave a review if you like the mod. Inbox me if you want. Cheers. Download: All available PS2 games are listed below
