The Spitfire Supermarine Introduction Spitfire is more than just an airplane. It's an icon. It is, moreover, an icon that is quintessential, undeniably and British. Few Britons would dispute the assertion that The Spitfire Supermarine was the most famous aircraft ever served in the Royal Air Force. However, it is appropriate to ask why the Spitfire had to achieve its iconic status, to the point where it eclipsed other types of aircraft whose achievements were hardly less significant. The Repair Guide Description Today look and sound Spitfire strutting its stuff is the highest point of any air show. More than 22,000 of these aircraft were built, and the youngest survivor - the Seafire variant - first flew in 1947, making it 60 years old. However, preparation for such longevity was not a consideration for those who designed and built these aircraft. During the heaviest periods of the war, the Spitfire had an average life of only a few weeks. In the years after the war, the number of Flying Spitfires plummeted, and by the mid-1960s only eight remained in the UK. This was followed by the epic film Battle of Britain, which needed all the operational Spitfires it could get to perform aerial battle scenes. The film, released in 1969, was a huge box office success. This also led to an explosion of interest in surviving flying Spitfires, and showed that almost anyone, provided he or she was rich enough, could own and possibly fly a Spitfire. This book provides a brief history of the dt of this iconic aircraft and a fascinating behind-the-scenes insight into what is involved in the recovery, flight and maintenance of the Spitfire today, almost 70 years after the first prototype flew. About authors Dr. Alfred Price served for 15 years as a crew officer in the Royal Air Force, where he was a crew member on Vulcan bombers specializing in electronic warfare and air combat tactics. After leaving the service, he was a staff writer on aviation issues, and is a respected aviation historian and recognized authority on Spitfire. He is a member of the Royal Historical Society. Paul Black joined the RAF in 1976 and was trained as a glider fitter. In 1993, he was recruited into the Battle of Britain Memorial Flight (BBMF) and remained in the unit until he retired from full service in 2002. His specialized knowledge of vintage aircraft, and in particular the Spitfire, was considered so valuable for flying that he was accepted into the RAF as a reservist, working as an airframe specialist at BBMF.
